Green corner – Save a tree today!

Mott MacDonald is committed to integrating sustainability

into our operational practices and culture. As a world leading consultancy business, we are always seeking to improve our own performance and reduce the environmental impact of our business. Meanwhile, many of our staff are committed to living sustainably in their personal lives – as an employee-owned company Mott MacDonald shares their concerns. We feel an ethical obligation to reduce our emissions and resource use and have committed to reducing our per capita carbon footprint by a minimum of 5% year on year.

We print our reports and client submissions using recycled, double-sided paper. Compared to printing single sided on A4 virgin paper, double sided printing on recycled paper saves the equivalent of two trees, over a ton of CO2 and a cubic metre of landfill space for every 100 reams. By choosing the greener path we have been able to achieve efficiencies benefiting both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Going Green' initiative:

- When possible, we scan rather than print and consider what really needs to be on paper
- We use electronic faxing when practicable
- We work on e-forms
- · We use recycled paper when possible
- · Reducing paper in the office creates a better working environment for our staff and our clients

We believe that you, as one of our esteemed clients, will share our concern to conserve precious resources for the benefit of our planet and its inhabitants.

1. Introduction

The concept of community-based animal health workers (CAHWs) probably arose from experiences in the human health sectors. The terminology "barefoot vets" seems to derive from china's successful and on-going use of "barefoot doctors" to bring basic services to the masses.

Growing interest in CAHW systems is largely related to the high impact on animal health and human livelihoods resulting from improved basic veterinary care in polder communities.

The Blue Gold Program has been implementing Farmers Field School (FFS) in different polders using specific curriculum of livestock, fisheries and agriculture. Farmers need different technical supports to take care of their animals and birds. However, they do not have access to control or treat parasitism and many communicable diseases. But they have got knowledge from FFS on animal rearing which can effectively enhance income and food security. Furthermore, in order to ensure safe food supply from food-borne hazards and protecting farmers against transfer of novel diseases from animal to human, CAHW can play a vital role in these issues with the assistant of livestock department. Based on recommendations made by the Annual Review Mission (2016) Blue Gold is aiming to withdraw FO's role in conducting fish/livestock FFS. For the 10 new polders, we will therefore have to develop new facilitators who can run these FFSs while still maintaining quality of the FFS. In order to sustain Blue Gold livestock activities in the WMG, management has decided to develop some of the FTs into CAHWs in 10 new polders. Six days long training program has been organized for capacity building of FTs on CAHW service system. The training was inaugurated by District Livestock Officer of Khulna and Focal Point of DLS at CSS Ava centre. As there is a shortage of manpower in the livestock department, these CAHW would be playing an excellent role to assist livestock production in the polders. They are not only servicing the WMG members but also securing their livelihood. For sustainable BGP activities in the polders, CAHW will be one of the significant pillars for WMG.

Day 01

Training was started with pre-evaluation of the FTs on testing their knowledge on vaccines and vaccination services then went for the opening session. It was inaugurated by Dr. Sayed Anwerul Islam, District Livestock Officer of Khulna. In his inaugural speech he said that FTs would be acting as a community member of Department of Livestock Services (DLS). They will earn by vaccination services. He told them, "You learn and give the services to the WMG peoples". Cattles are valuable assets of a farmer and it helps to maintain ones livelihood also. FTs are going to get another professional training which is very much needed for our country. DLS have shortage of manpower, so they can act as an assistant of the department for the improvement of livestock in the country. He advised the FTs to provide quality services so that farmer can get proper service and there would be no fraudulent behavior with them. This will be their halal income and take money by serving the farmers. They are young and energetic, and will have more time to give service

to the community. Communicate with respective local offices and if needed, they may ask him/her any time. DLS is very good partner of Blue Gold and always support to its activities.

The focal point admired DLO of Khulna for his involvement in BGP program and very much supportive to BGP activities. He welcomed Satkhira and Patuakhali FTs to this course also. He emphasized rapport build up with respective upazila offices and suggested them to make strong linkage with officers. As most of the cattle vaccines are available in the DLS, so that FTs should be good communicator in this regards for getting better support from ULOs.

Mr. Zahangir mentioned that zonal coordinator Mr. Matior Rahman was involved in another training in Kustia and he would come in the

training later on. He appraised the trainers and said that they were skilled and they knew how to develop a person. Furthermore, he requested new CAHWs to be attentive in the training and go back to respective residential areas as a resource person for the polder community.

The course objective was narrated by Dr. Munir Ahmed. He said that FTs would become animal health service provider. The course was designed with whole practical activities by hands on, dummy vaccination practice, practice on real animal, and finally field practice in the WMG level.

The Whole inauguration session facilitated by Mr. Golam Murtuza, Training Coordinator, BGP.

Then Mr. Murtuza took session on training norms and participants' expectation from the training of the participants. The main expectations were;

- Wanted to know vaccines
- Wanted to know about animal diseases
- Wanted to know about animal feed and fodder requirements
- Wanted to know where and how the can get the vaccines

Facilitators: Dr. Munir Ahmed, Livestock Expert, BGP, Dr. Sayed Anwerul Islam, DLO Khulna, Dr. Md. Lutfor Rahman, Focal Point DLS, Dr.Md. Shariful Islam, ULO Dumuria and Biswas Ali Mortoza, Training Coordinator, BGP

Method: Participatory discussion and practical

The topics were facilitated like training norms, participants' expectation, working strategy of CLW, Different breed of cattle and its characteristics, handling and restraining methods of cattle and concept and process of artificial insemination and its implication on vaccination services.

Facilitators: Dr. Md. Lutfor Rahman, Focal Point DLS, Dr.Swapan kumer Ray ULO Batiaghata, Dr. Munir Ahmed, Livestock Expert, BGP and Biswas Ali Mortoza, Training Coordinator, BGP

Methods: Practical, group work and Interactive discussion

The day two stared with recap session by Host Team leader (HTL), questions, answer and participatory discussion was taken to fill up the gap of the sessions. The sessions were taken place on Common Parasitic diseases, types of parasites, internal helminths (roundworms, tapeworms and flukes) as well as external arthropods (mites, lice, ticks, and flies). Protozoal disease, common symptoms, treatment, control method of parasitic diseases and common nutritional diseases like Bloat, Grass tetany, Hypocalcaemia (milk fever), Ketosis (pregnancy toxaemia) and its symptoms, treatments, vaccines and vaccination, method of vaccines, types of vaccines like FMD, Anthrax, BQ,HS, and management of vaccines cold chain etc. were discussed at the sessions. The purpose of the vaccine "cold chain" is to maintain product quality from the time of manufacture until the point of administration by ensuring that vaccines are stored and transported within WHO recommended temperature ranges.

In the evening time, Mr. Md. Aminul Islam PCD, BWDB, Mr. Md. Matior Rahman, ZC, Khulna Mr. Md. Shorab Hossian ZC Patukhali and Mr. Md. Awolad Hossain institutional advisor BGP attended in the training. In the session, Mr. Awolad said that FTs should use the training knowledge and take it as profession. Besides, they might expand their knowledge by horizontal learning approach. He suggested them to be linked with UP where they can get sitting arrangement and their business will be more door step to the farmers.

Mr. Shorab hossain expected that CLWs would learn properly, attentive in the training, use kit materials properly and play effective role in the WMG. Mr. Matior Rahman also expected from CLWs that they would emphasize on practical

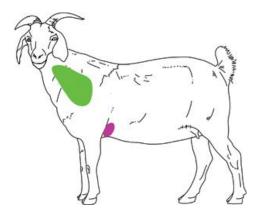

works, be a skilled vaccinator, and showed an effective role in polder level so that WMG members might got benefit from them. PCD showed his satisfaction observing the training and advised them that the CLWs would continue making good relation with government agencies after finishing Blue Gold. Play effective role for the improvement of livestock production, food security and economic activity.

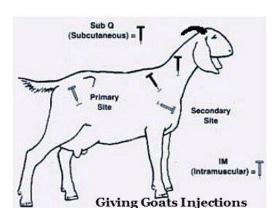

Facilitators: Dr. Shusen Kumer Halder, ULO, Fultala, Dr. Bangkim Kumer Halder, VS, Batiaghata, Dr. Munir Ahmed, Livestock Expert, BGP and Biswas Ali Mortoza, Training Coordinator, BGP

Method: Practical, group work and Interactive discussion

The session covers on this day on different type of feeding technology and feeding system for beef fattening and dairy cattle, thump role feeding practices, introducing different feed ingredient and its practical demonstration, hands on practice on one kg ration formulation, UMS preparation. Cultivation method of high yielding fodder crops like Napier, Para, Jamboo and local variety. Practical demonstration of vaccination process, vaccination and injection sites of animals are also covered in the sessions.

1-5

Day 04

Facilitators: Dr. Munir Ahmed, Livestock Expert, BGP and Biswas Ali Mortoza, Training Coordinator, BGP

Method: Practical, and Interactive discussion

The whole day was occupied with practical activities on identification of vaccines and vaccine equipment and its functions (Kit box), Firstly, dummy practice was done on banana tree and then on real animal body. All participants practiced vaccine application until their hands become free and the session makes them confident.

Day 05

Field vaccination campaign has been arranged for real situation practice at Tonla WMG in polder 25. After

arriving in the WMG, the EC members of Tolna WMG welcomed the participants and then started the vaccination program. A travis has been set up by WMG members for controlling the animals during vaccination time at Tolna high school playground. Four types of vaccines like FMD, anthrax, HS and PPR had been practiced there. Around two hundred cattle and ninety goats were being vaccinated from 7.30 to 10.30 AM. A participant learned how to organize vaccination campaign, handling and controlling the animals, deal with client and registration procedures of animals in the field. All

participants became more confident from this vaccination campaign. In the afternoon, an interaction

discussion held on to analyze what went wrong during vaccinations in the real field situation. Then, discussed on what precautionary measurement to be taken during pre and post vaccination campaign, etc.

Day 06

Day six started with recap by HTL. Then a session was started on record keeping for vaccination registration and role and responsibility of community livestock workers. Under this session they learned on vaccination register, vaccination card's management, monthly demand plan preparation and report writing. Another session was on how to develop them as private entrepreneurs in the local community (Business Plan). On

this session they learned about business issues. The closing session was organized in the afternoon where District Livestock Officer, Zonal Coordinator Khulna, Civil Engineer, Senior Socio Economist of Blue Gold were present. DLO said that CLWs are very important person and become a professional for the livestock department and they would be acting as extension agents on behalf of respective upzaila livestock offices. He advised them to make strong linkage and be a good professional. In this session, participants said that they were satisfied and being confident from the training. They committed for their new role and responsibility as a CLW to BGP. They thanked to Blue Gold for

organizing the training and creating new avenue for their livelihood and improvement of livestock production of WMG.
