# Green corner – Save a tree today!

**Mott MacDonald** is committed to integrating sustainability into our operational practices and culture. As a world leading consultancy business we are always seeking to improve our own performance and reduce the environmental impact of our business. Meanwhile, many of our staff are committed to living sustainably in their personal lives – as an employee-owned company Mott MacDonald shares their concerns. We feel an ethical obligation to reduce our emissions and resource use and have committed to reducing our per capita carbon footprint by a minimum of 5% year on year.

We print our reports and client submissions using recycled, double-sided paper. Compared to printing single sided on A4 virgin paper, double sided printing on recycled paper saves the equivalent of two trees, over a ton of CO<sub>2</sub> and a cubic metre of landfill space for every 100 reams. By choosing the greener path we have been able to achieve efficiencies benefiting both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Going Green' initiative:

- When possible we scan rather than print and consider what really needs to be on paper
- We use electronic faxing when practicable
- We work on e-forms
- We use recycled paper when possible
- Reducing paper in the office creates a better working environment for our staff and our clients

**We believe that you, as one of our esteemed clients, will share our concern to conserve precious resources for the benefit of our planet and its inhabitants.**

## Background

The household survey was conducted in Batch 1 Polders, namely: Polders 22, 30, 43/2D and 43/2F excluding Polder 43/2A because when it was decided to also include this under Batch 1, household survey work was already in progress.

Polders 22 and 30 are located in Khulna District as shown in Figure 1. The Polder maps at the right side show the villages included in the household survey.

**Figure 1. Location of Polders 22 and 30 and Villages**

Polder 43/2D is located in Patuakhali District, Barisal Division (see Figure 2) and 43/2F though in Blue Gold's Program Document under Patuakhali district, it is actually located in Barguna District.

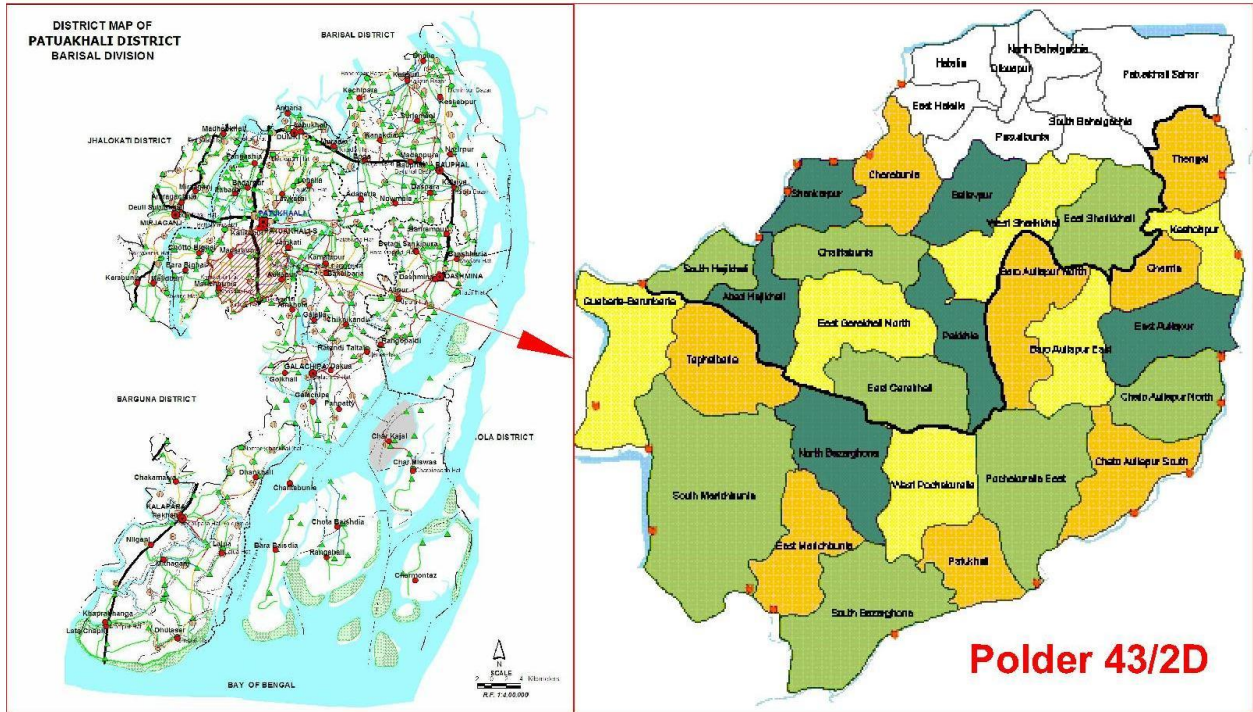

Figure 2. Location of Polder 43/2D and Villages

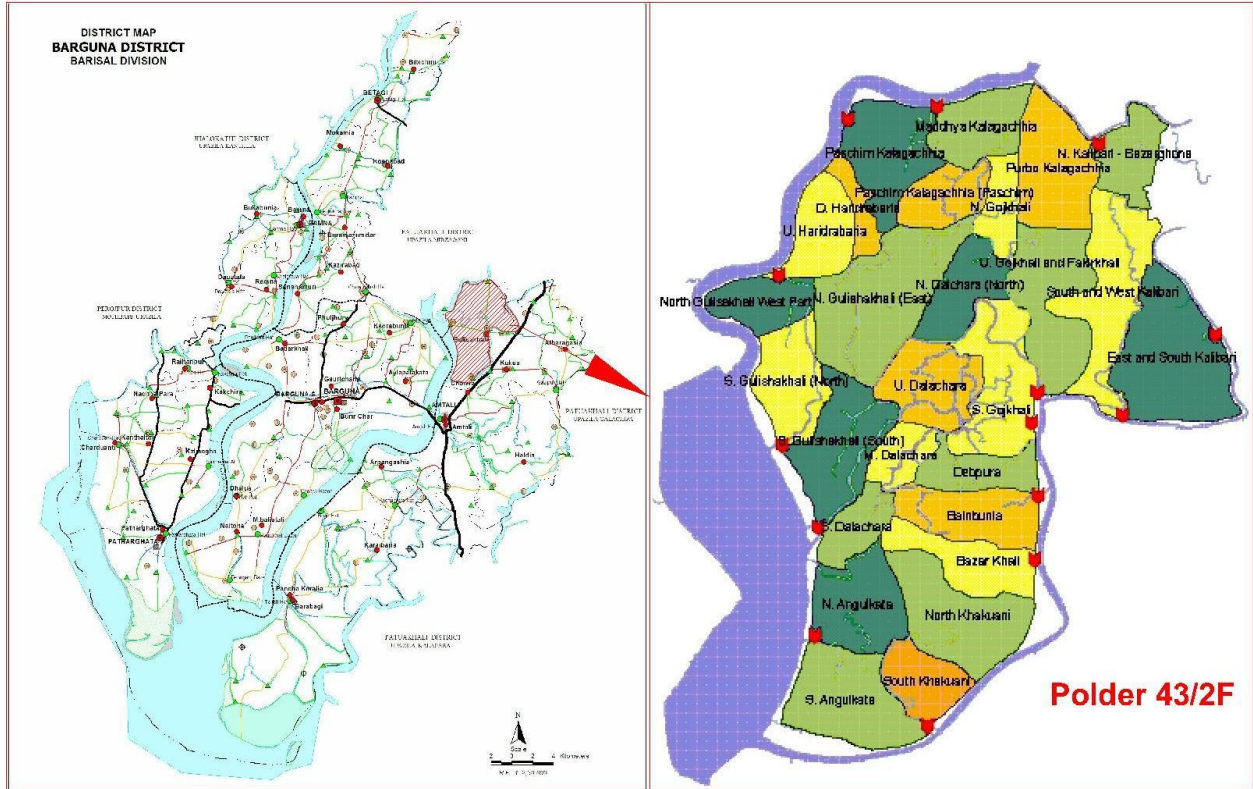

Figure 3. Location of Polder 43/2F and Villages

## I. Objectives and Methodology

The household survey was primarily undertaken to determine the number of households, identify different stakeholder groups, and the total number of potential members of the existing Water Management Groups (WMGs) in the 4 polders. Specifically, the survey aims to:

1. Gather basic household information on household members, food security, basic socio-economic and agricultural related data in each of the 4 IPSWAM polders for planning purposes (Village Action Plan and Polder Development Plan);
2. Identify the different stakeholder groups in the polder for needs assessment and planning purposes; and
3. Establish total number of potential household beneficiaries in each polder and potential members of WMGs to guide the WMO strengthening process.

### Methodology, Manpower and Duration

Blue Gold engaged 37 Village Assistants (VAs) residing from some of the villages covered by the survey to conduct household interviews in the 4 polders. The survey questionnaire used by the VAs is attached as Annex A.

The VAs started the actual interviews in September 2013 and completed the survey work only in February 2014 due to the inaccessibility of some villages (Note: Monsoon period last was delayed and extended until October 2013).

Four (4) Data Entry Operators were engaged and started data entry work in the 3<sup>rd</sup> week of November 2013 and this was completed (including corrections and cleaning of data) in the last week of February 2014.

## II. Findings and Analysis

### A. Number of Households in the Surveyed Polders

The household survey covered a total of 29,667 households in 89 villages under Polders 22, 30, 43/2D and 43/2F. Table 1 presents the number of households in each of the villages under the jurisdiction of the 4 polders covered by the household survey.

**Table 1. Number of Households by Polder and Village**

		<b>Total (12 Villages)</b>	<b>6639</b>		
		<b>2 Districts/Zones</b>	<b>4 Polders</b>	<b>89 Villages</b>	<b>29,667</b>

The data show that the average number of households per village is **333**; lowest is **41** and the highest is **1,089** households in a village. Polder 43/2F has the highest average household density per village at 553/village.

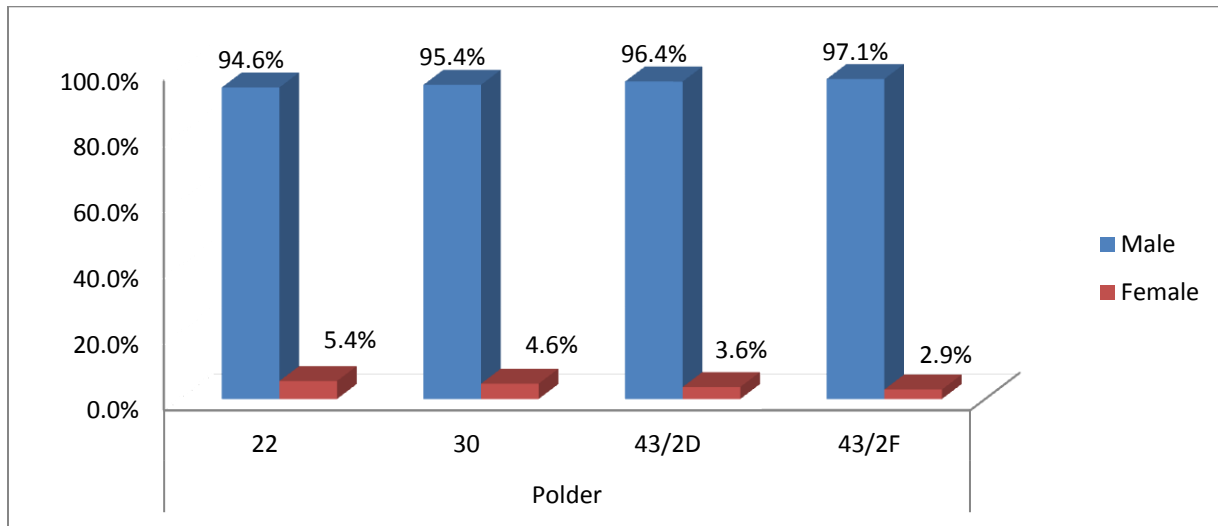

Overall, Polder 43/2D has the highest number of households (11,801) in a village and Polder 22 the lowest number of households (2,132). Polder 30 covers the highest number of villages (40).

## B. Gender of Household Heads in the Polders

Blue Gold adopted ILO's definition of Female Headed Households with an added clause as follows: *Households where either no adult male is present, owing to divorce, separation, migration, non-marriage or widowhood, or where men, although present, do not contribute to the household income. Moreover, decision-making in important household matters is done by women.*

This definition was the basis of the household survey enumerators in categorizing the household heads during the conduct of the survey. Figure 4 presents the distribution of household heads by gender.

**Figure 4. Distribution of Household Heads by Gender**

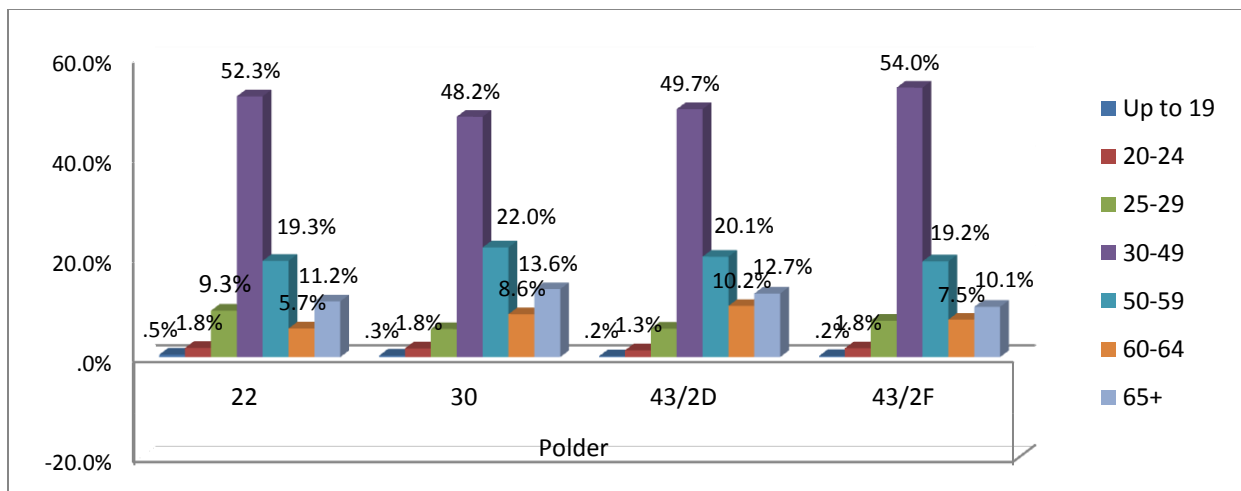

The data clearly shows that Polder 22 has the highest percentage of women-headed households at 5.4% while Polder 43/2F has the least at 2.9%. It should be noted here that population of Polder 22 consists predominantly of Hindu people that may somehow contributed to the higher number of women-headed households. A widow of Hindu religion rarely remarries.

### C. Age of Household Heads in the Polders

It is interesting to note that the majority of the household heads in all polders surveyed are within the age range of 30-49 years old. The second highest in percentage (again in all polders) is the age range of 50-59.

**Figure 5. Distribution of Household Heads by Age**

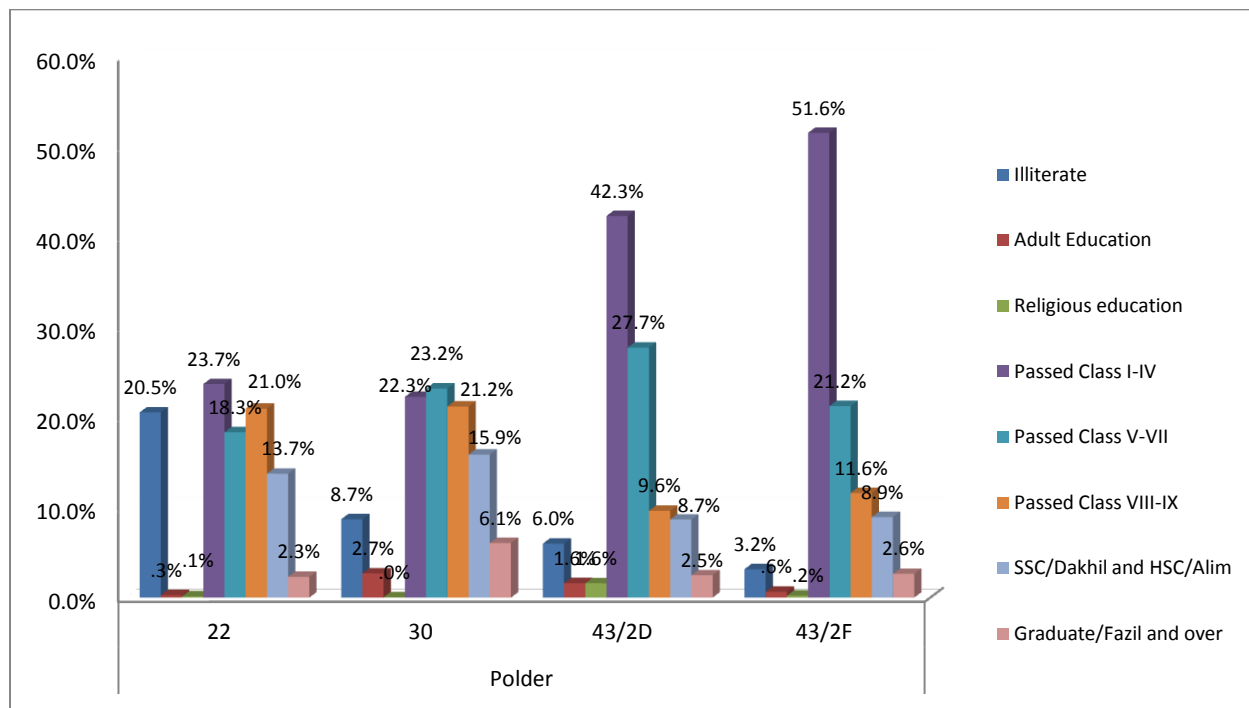

### D. Educational Attainment of Household Heads in the Polders

The data revealed that the highest incidence of illiteracy is in Polder 22 (20.50%) and the lowest is in Polder 43/2F (3.20%) which is consistent with Bangladesh Bureau of Statistics data. The majority of the

household heads in all polders have passed Class 1-VII. Overall, 3.6 % of the household heads completed Graduate level and above and majority of this is in Polder 30.

**Figure 6. Educational Attainment of Household Heads in the Polders**

## E. Household Sources of Income in the Polders

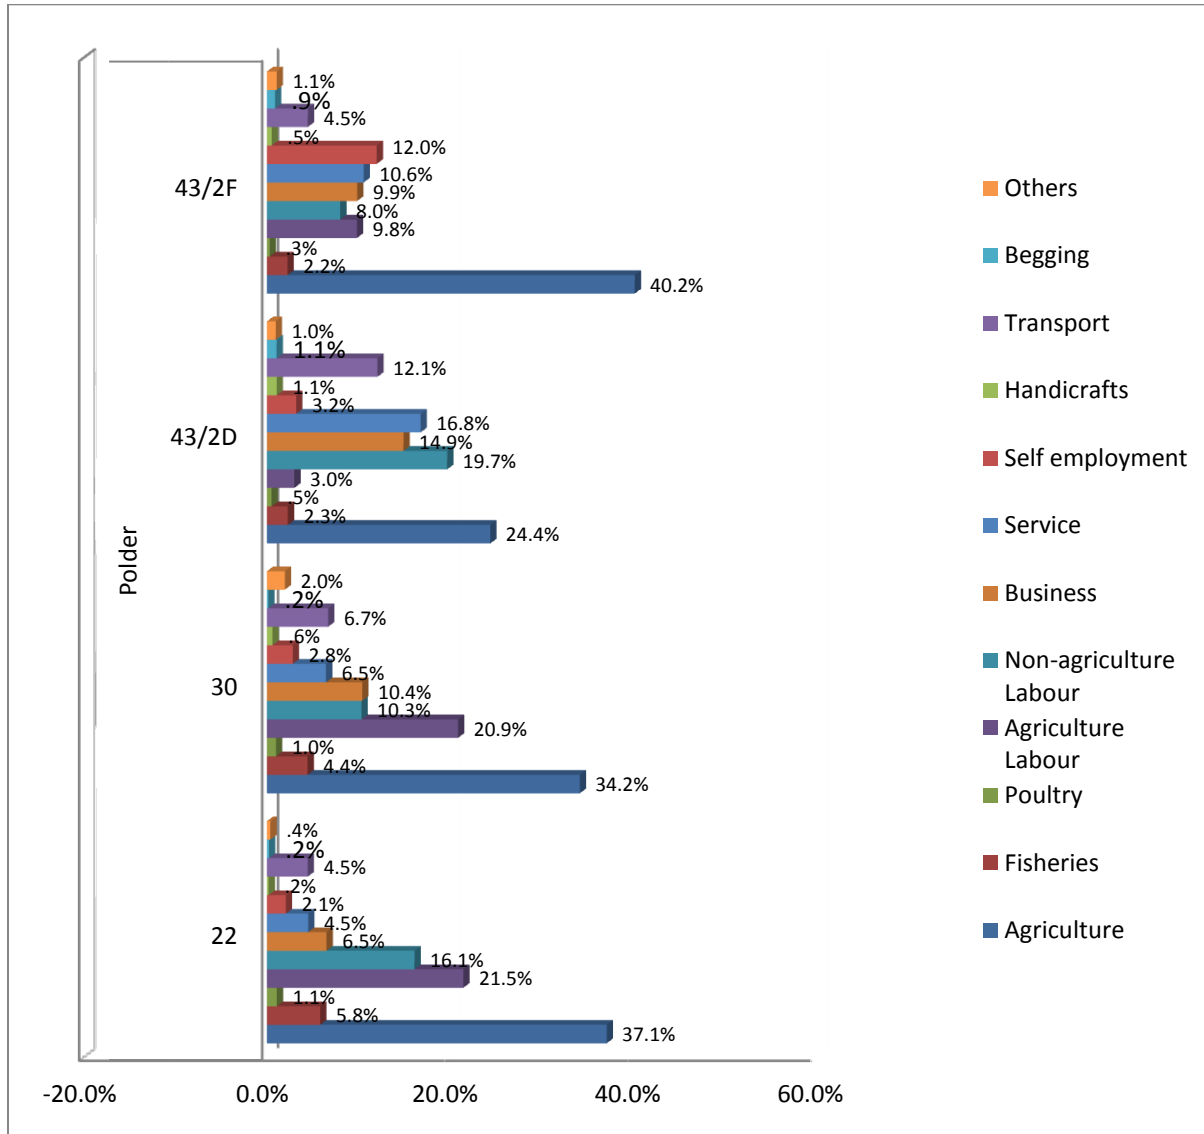

### E.1. Main Sources of Income

The major sources of income in surveyed polders are shown in Figure 7.

Agriculture is by far the main source of income by majority of the household heads in the polders surveyed. This is followed by agriculture labor in the 2 polders of Khulna. The majority of household heads in the 2 Patuakhali polders showed some variation in other major source of income.

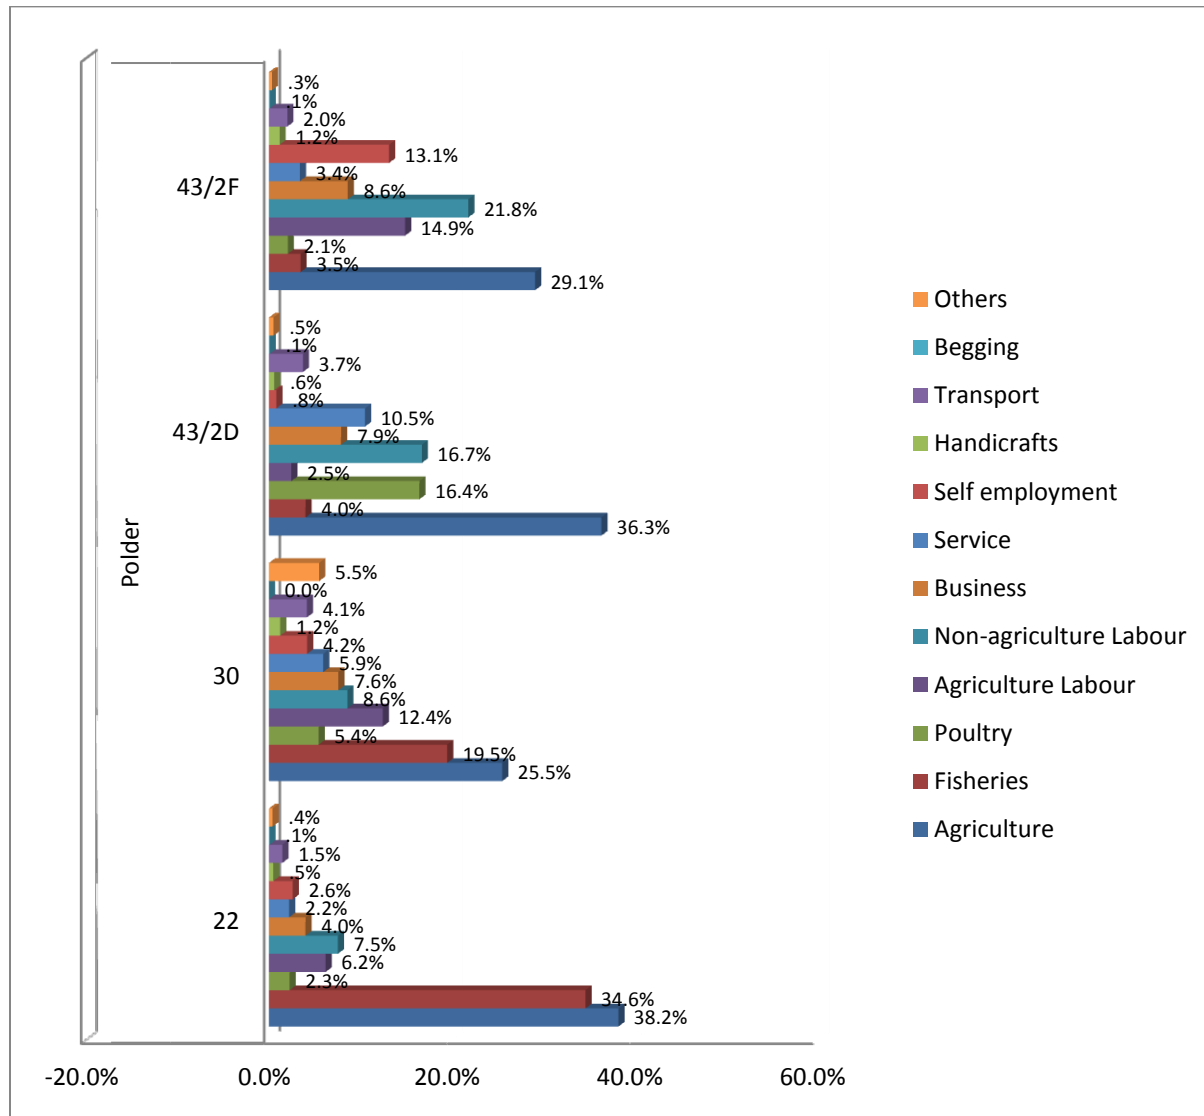

43/2D which is located near the town proper has a great number of household heads doing non-agriculture related labor (19.7%) while in Polder 43/2F on the other hand, many household heads are engaged in service and self-employment as second major source of income. Perhaps due to well developed navigational facility to Dhaka, more people in Polder 43/2F find it more profitable to engage in small trading and other services than farming.

**Figure 7. Main Sources of Income of Household Heads**

## E.2. Secondary Sources of Income

**Figure 8. Secondary Sources of Income of Household Heads**

## F. Household Land Ownership and Usage in the Polders

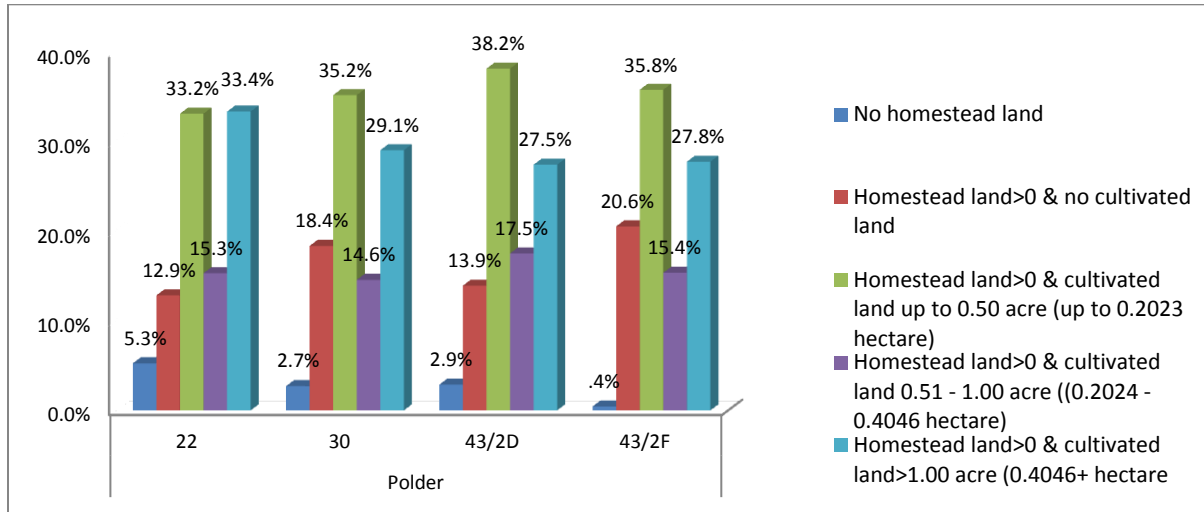

The survey on total land owned by household head respondents covers homestead, garden, pond/ditch and cultivable land.

### F.1. Total Land Owned

Figure 6 showed that about 36% of household heads in the 4 polders own homestead land (>0 acre) and cultivable land up to 0.50 acre (or up to 0.2023 ha.) while about 29% household heads owned more than 1.0 acre of cultivable land. This also indicates that about 65% of the household heads in the 4 polders own homestead and cultivable land of >0-1.0 acre. There were only few who do not have homestead land (2.4%) and cultivable land (16.7%). Some of these are residing in embankment slopes and/or residing in somebody else's land.

**Figure 9. Total Size and Usage of Land Owned by Household Heads**

**F.2. Average Land Owned**

Table 2 showed the average land size owned by household heads for each type of land.

**Table 2. Average Size of Land Owned by Household Heads in the Polders**

Land Usage/Type	Polder									
	Total		22		30		43/2D		43/2F	
	n	Average Decimal	n	Average Decimal	n	Average Decimal	n	Average Decimal	n	Average Decimal
<b>Household Land</b>	29667	110.0	2132	121.5	9095	117.0	11801	102.0	6639	111.2
<b>Homestead and fruit garden</b>	29667	15.2	2132	13.4	9095	13.7	11801	14.7	6639	18.9
<b>Pond and Ditch</b>	29667	7.0	2132	7.9	9095	9.3	11801	5.9	6639	5.3
<b>Cultivable land</b>	29667	87.8	2132	100.2	9095	94.0	11801	81.3	6639	87.0

**G. Number of Adult Family Members in Households in the Polders**

Survey data on Table 3 show that the average number of adult members in the surveyed households in the 4 polders is 3 and the number of male and female is almost the same.

**Table 3. Distribution of Adult Members**

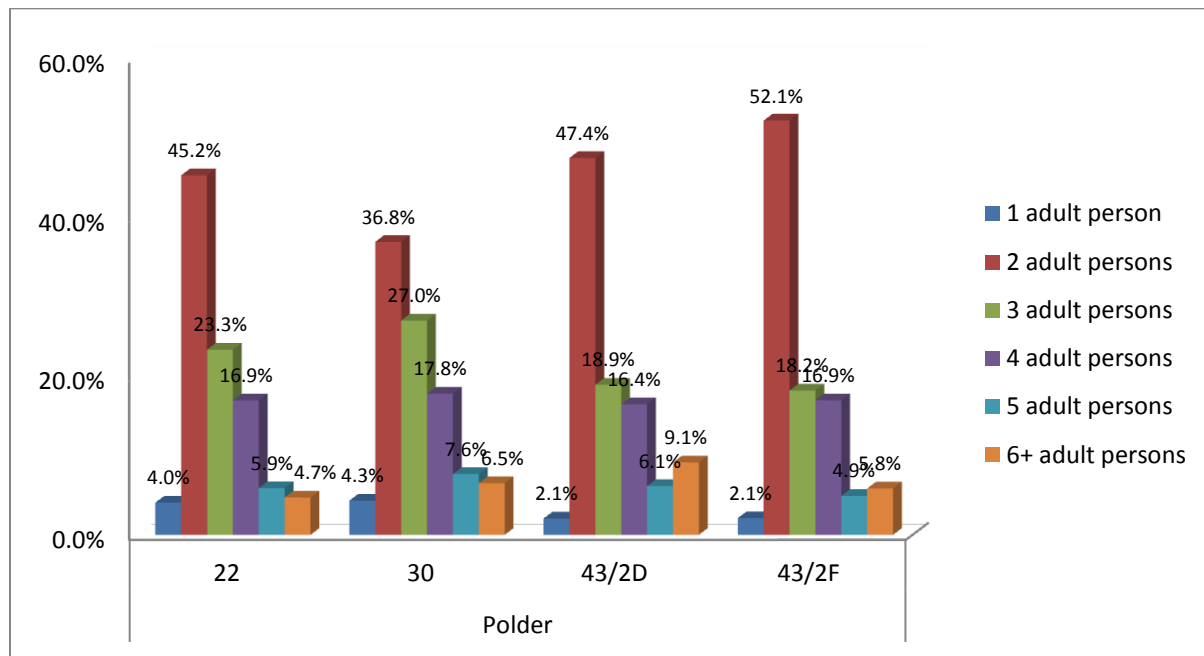

Adult Members and Gender	Polder									
	Total		22		30		43/2D		43/2F	
	n	Average	n	Average	n	Average	n	Average	n	Average
<b>Adult family member</b>	29667	3.05	2132	2.93	9095	3.11	11801	3.10	6639	2.92
<b>Adult male member</b>	29667	1.53	2132	1.46	9095	1.55	11801	1.57	6639	1.47
<b>Adult female member</b>	29667	1.52	2132	1.48	9095	1.57	11801	1.53	6639	1.44

## H. Membership in Cooperative Society

### H.1. Distribution of Membership in Cooperative Society

At the time the household survey was conducted in September 2013, majority of the household heads have no membership in any cooperative (81.5%). This may be attributed to limiting cooperative membership per WMG to 25 by Department of Cooperative at the time of registration. Polder 22 has the highest percentage of membership in cooperative society among the household heads at 38.2%. See Figure 10 below for details.

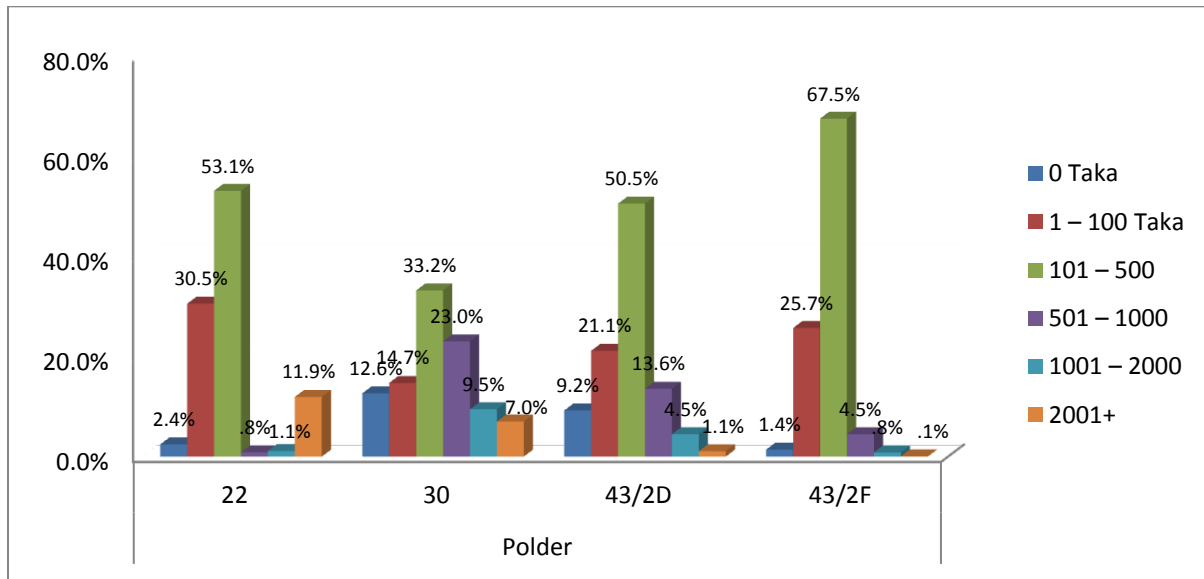

**Figure 10. Distribution of Membership in Cooperative Society in the Polders**

### H.2. Distribution of Current Deposits in Cooperative Society

Figure 11 shows that majority of the cooperative members have deposited Taka 101-500 in the cooperative at the time of the survey (51.5%) and 22.6% deposited Taka 100 and less.

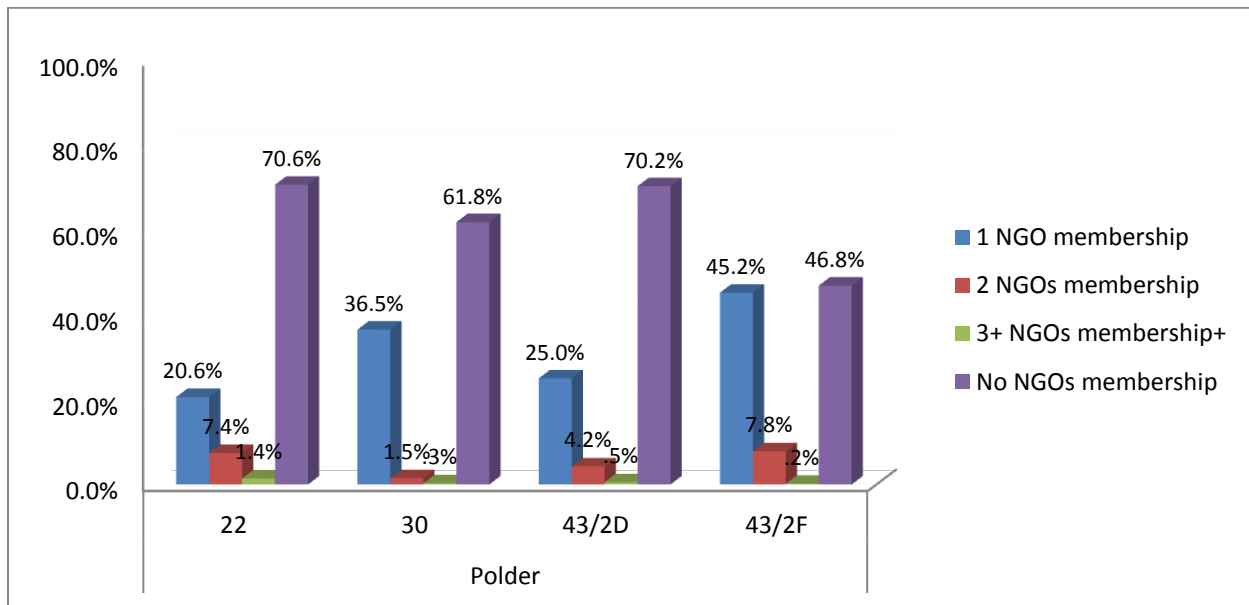

**Figure 11. Current Deposits of Cooperative Society Members in the 4 Polders**

**I. Membership in NGOs**

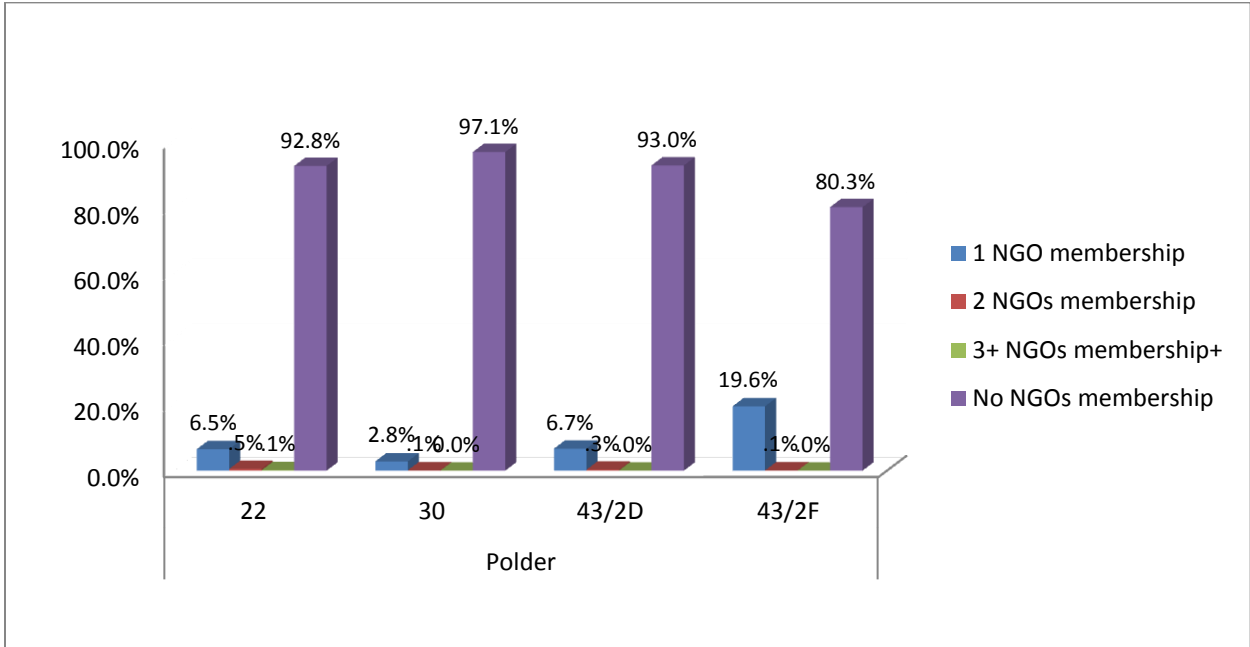

Figure 12 shows that about 32.7% of the household heads in the surveyed polders have membership in at least one NGO. NGO membership among female is higher at 30.5%. This is consistent with findings of several studies showing this trend where more women become involved in micro-credit program by NGOs in the rural areas.

**Figure 12. Distribution of NGO Membership**

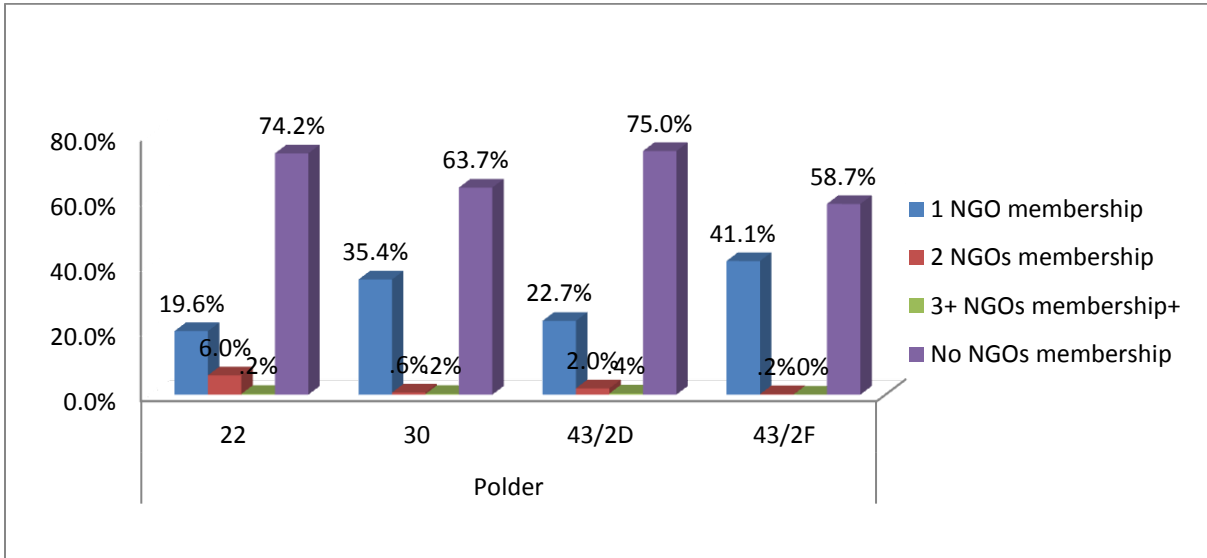

**I.1. Male Membership**

**Figure 13. Male Membership in NGOs**

**I.2. Female Membership**

**Figure 14. Female Membership in NGOs**

**J. Food Security Status (Self Assessment)**

During the survey, the household heads were asked to assess their status with regard to food security i.e. if they always have surplus; not deficit; sometimes deficit; or always deficit.

Table 4 shows that more households said they are experiencing food deficit sometimes (36.5%) while 29.5 % said they are not food deficit. Polder 43/2F has the most number of households experiencing

deficit in food sometimes (47.5%) and experiencing food deficit always (25.0%). This may be attributed to the severity of the effects of major natural calamities in this Polder due to its proximity to Paira River.

**Table 4. Food Security Status (Self-Assessment)**

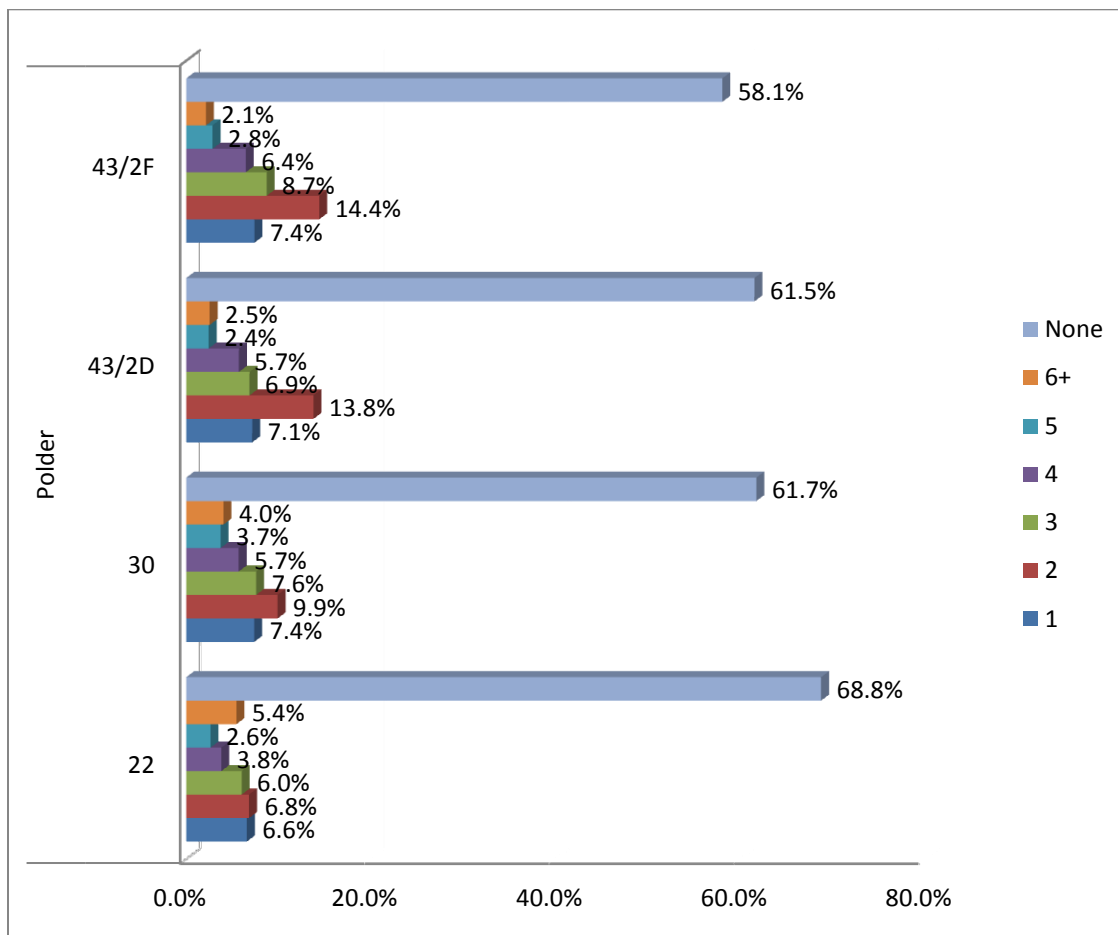

Status	Polder									
	Total		22		30		43/2D		43/2F	
	n	%	n	%	n	%	n	%	n	%
Surplus	4322	14.6	313	14.7	1406	15.5	2065	17.6	538	8.1
Not deficit	8724	29.5	643	30.2	2330	25.6	4470	38.1	1281	19.3
Sometimes deficit	10795	36.5	718	33.7	3487	38.3	3436	29.3	3154	47.5
Always deficit	5741	19.4	457	21.4	1872	20.6	1751	14.9	1661	25.0
Total	29582	100.0	2131	100.0	9095	100.0	11722	100.0	6634	100.0

## K. Livestock Owned

### K.1. Cattle

Figure 15 shows that majority (61.3%) of the households surveyed does not own any cattle. Distribution of cattle ownership by households is shown below:

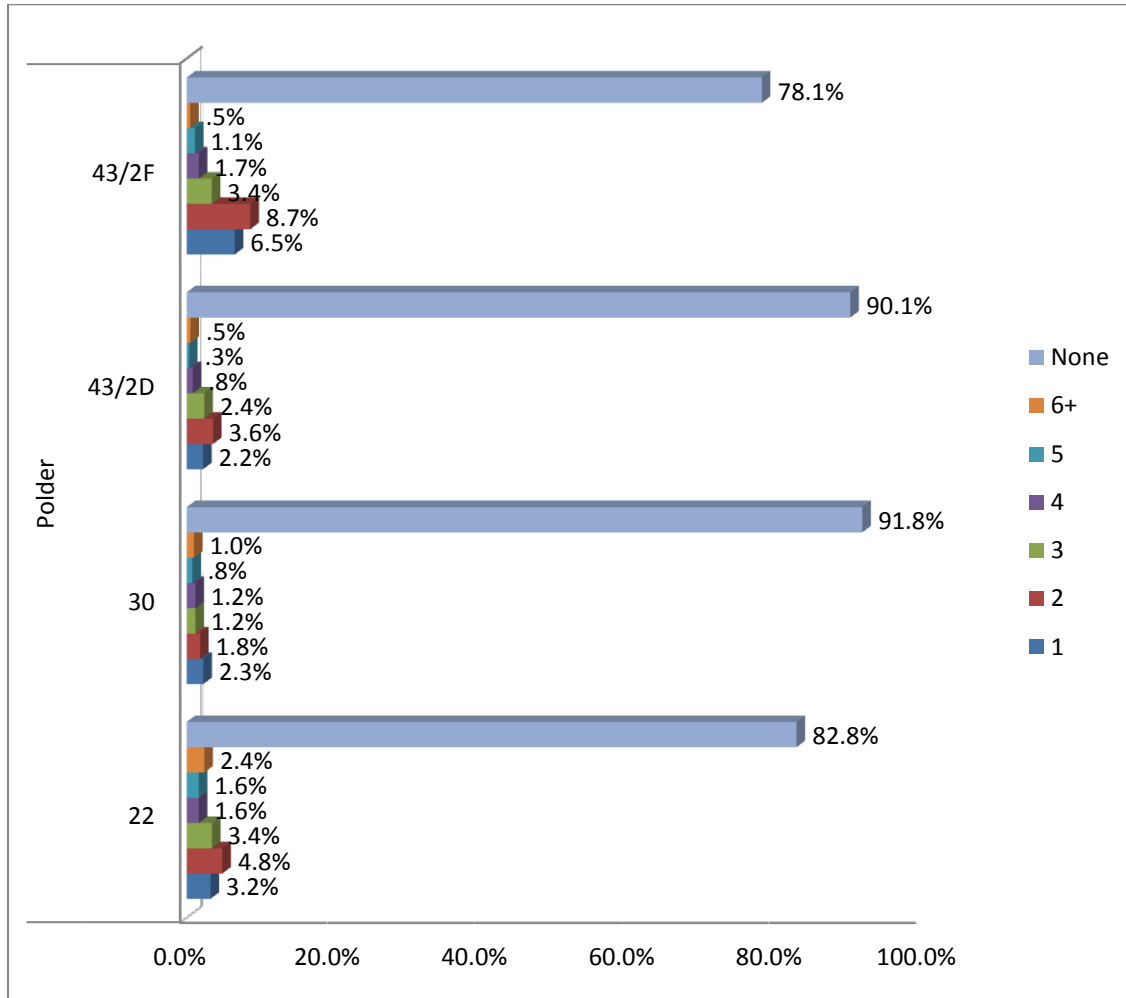

**Figure 15. Livestock Owned: Cattle**

**K.2. Goat/Sheep**

Only 12.6% of the surveyed household heads said they own about 1-4 goats/sheep while only very low percentage (1.5%) owns more than 5.

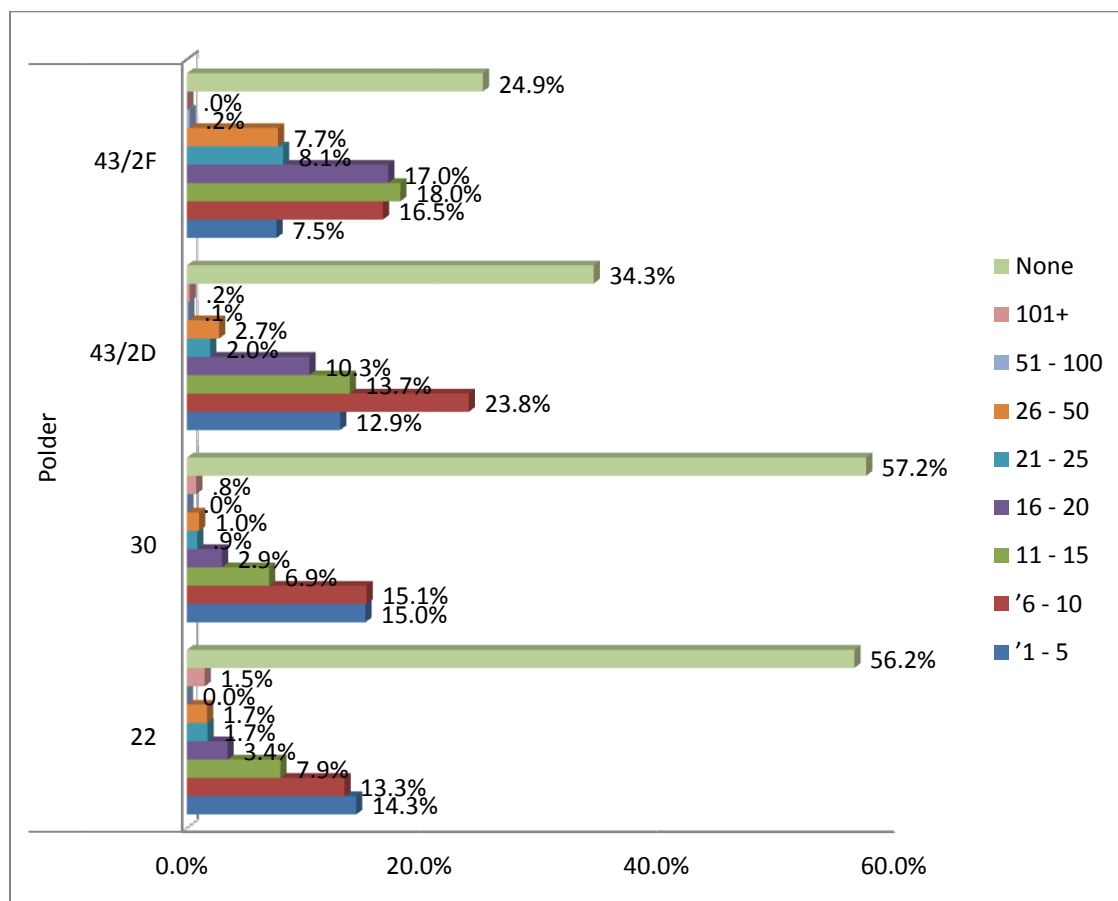

**Figure 16. Livestock Owned: Goat/Sheep**

**K.3. Poultry/Duck**

About 60% of the household heads own poultry/ducks and majority of which own about 5-15.

**Figure 17. Livestock Owned: Poultry/Duck**

### III. Conclusions

The data in the household survey are now being utilized by Blue Gold, as follows:

1. Findings of the household survey are used in firming-up membership of existing WMGs and in the effort of increasing WMG membership that are vital to their organizational strengthening. The Household survey outcome provided a clear profile of the existing and potential members of WMGs and gave concrete figures on the present number of households in each of the 4 polders surveyed and the potential number of male and female members of the WMGs; and
2. Other findings and data on other aspects e.g. sources of income of household heads, land ownership, food security status, membership in NGOs and cooperative with current deposits and livestock owned are bases for identifying the major stakeholder groups present in the polder areas as well as in organizing village needs assessment meetings, planning for FFS and business development. Overall, the data are important inputs to the formulation of Village Action Plans and Polder Development Plan.
