## Green corner – Save a tree today!

**Mott MacDonald** is committed to integrating sustainability into our operational practices and culture. As a world leading consultancy business we are always seeking to improve our own performance and reduce the environmental impact of our business. Meanwhile, many of our staff are committed to living sustainably in their personal lives – as an employee-owned company Mott MacDonald shares their concerns. We feel an ethical obligation to reduce our emissions and resource use and have committed to reducing our per capita carbon footprint by a minimum of 5% year on year.

We print our reports and client submissions using recycled, double-sided paper. Compared to printing single sided on A4 virgin paper, double sided printing on recycled paper saves the equivalent of two trees, over a ton of CO<sub>2</sub> and a cubic metre of landfill space for every 100 reams. By choosing the greener path we have been able to achieve efficiencies benefiting both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Going Green' initiative:

- When possible we scan rather than print and consider what really needs to be on paper
- We use electronic faxing when practicable
- We work on e-forms
- We use recycled paper when possible
- Reducing paper in the office creates a better working environment for our staff and our clients

**We believe that you, as one of our esteemed clients, will share our concern to conserve precious resources for the benefit of our planet and its inhabitants.**

FFS	Farmer Field School
FO	Farmer Field School Facilitator
IPM	Integrated Pest Management
WMG	Water Management Group

# 1. Background

Blue Gold Program of Bangladesh Water Development Board is working for the improvement of livelihood and food security aspects of the polder dwellers through proper water management in their daily life especially in agriculture sector. To achieve its ultimate goal, the Blue Gold Program-BGP has established Farmer Field School – FFS at each of the Water Management Group-WMG area. In the FFS, farmers are helped to become more confident in making their own crop management decisions. Principles of the FFS approach are that the training is season-long (seed to harvest, egg to egg, etc.) and is based on learning from experience (practical learning) through a participatory learning process i.e. learning by doing.

Through FFS, farmers are learned to make observations and collect data in their own farm (crop field, homestead garden, pond, chicken pen, cow-shed etc.), to analyze these data and to make well-informed farm management decisions. Farmers also learn to test new ideas (e.g. new technologies, new crop varieties, fertilizer management, improved poultry rearing, animal feeds) by setting trials on their own farm. They learn how to evaluate, adapt, optimize and perhaps reject them for their own situation. The person who facilitates Farmers Field School in every week is known as Farmers Field School Facilitator-FO.

In this season, which has been started from November 2015 and completed in March 2016, Blue Gold Program at Patuakhali area has established 28 Farmer Field School. The module that has been facilitated in the FFS was comprised of homestead gardening, poultry rearing and nutrition. After completing all the learning sessions in the FFS, the FFS Facilitator (FO) organized a field day at each of the FFS working area. In this FFS cycle, we had total 28 Field Days at Patuakhali areas.

## 2. FFS Field Day Objectives

Objectives of the FFS field day are multidimensional. We have organized/established one Farmer Field School in a Water Management Group – WMG working area. In a WMG area, there are about 200 to 350 households. But we can include only 25 households in the Farmer Field School, which is really a very small portion of the total households. So, horizontal learning is one of the main objectives of the Field Day. Other objectives of the Field Day are given below:

- To exhibit the confidence of the FFS participants for growing vegetables, fishes, poultry & livestock in the homestead area by using improved agricultural technologies
- To aware other farmers on maximization of usages of homestead area
- To inform other farmers on activities of FFS performed
- To close FFS activities formally with certificate distribution among the FFS members.
- To arrange formal hand over of FFS to concern WMG along with a completion report

**Chairman of Kukua UP is delivering his views on importance of FFS in a FFD**

### 3. FFD Activities

In this 6<sup>th</sup> FFS cycle, Blue Gold Program, Patuakhali zonal office has organized total 28 FFS Field Days. FFD has organized by the FOs in pair. FFD has planned in the way that every day, each pair of FOs had FFD but for individual FO, it is in every alternative day. The FO who mainly organizes the FFD is called Concern FO and the other FO of the pair is called Guest FO. Concern FO was responsible for inviting, organizing and facilitating the FFD and the roles of Guest FO was assisting Concern FO in carrying materials & logistics, in preparing & decorating the booths, in facilitating the session, in keeping record on attendance, in distributing prize & certificates, also in distribution snacks and finally, assisting in pack-up of all materials for the next FFD.

In the FFS Field Day, the FFS members & Concern FOs pair prepared 4 booths on the basis of FFS curriculum and learning session. During the FFD, it was seemed to be a festival in the community especially among the kids & young. Different stakeholders from the community along with WMG EC people have attended in the FFD. FFS-wise date, location, attendance of the FFD is given in the **annexure-1**. The booths those have been prepared in the FFD are given below –

**Homestead Activities Booth**

- a. **Homestead Activities Booth** – Prepared a model of homestead with showing main house, kitchen house, cow-shed, poultry-shed, latrine, tube-well, ponds with dyke vegetables. Demonstrated earlier practiced vegetables plot (no beds) and improve practiced vegetables plot with beds. Demonstrated the space planning for vegetable growing & fruit tree plantation, management and also showed the model of Farm Yard Manure preparation pits.

**IPM Booth**

- b. **Integrated Pest Management Booth**- demonstrated on impact of IMP & techniques for IPM. Also different tools/equipment and materials used in IPM process.

- c. **Improved Rearing Practice of Backyard Poultry Booth** – demonstrated ideal poultry shed, improved “Hazar”, important vaccines for poultry, types of poultry feeds, feeding & watering tray etc. Illustrated improved poultry rearing method. Also shown important information through posters for chicks and broody hen management.

**Poultry Rearing Booth**

**Nutrition Booth**

- d. **Nutrition Booth** – demonstrated types of food, classification of foods, symptoms of malnutrition, daily foodstuff for pregnant mother, adolescent & lactating-mother; hygiene, sanitation & safe water; importance of hand-wash and importance of 1000 days care for mother & child etc. Demonstrated improved cooking process (i.e. process how to maintained food nutrients). Shown different

important message of hygiene, sanitation, Moringa leaves & pods and food & nutrient issues through posters.

In the very beginning of the FFD activity, the Concern FO invited the FFD Chairman & the guests to take their chair. Normally, President or Secretary of concern WMG presides the FFD session. In absence of them, respectable older community person is selected to chair the FFD session. During welcome address, FO informed the audience/community people on process of selecting FFS members, role of WMG in selection process and how they had conducted the FFS session and what were the FFS learning sessions. Then he/she divided the whole audience into 4 groups and invited them to visit the booths.

### 3.1 Booths Visit by the Participants

FO selected 4 FFS members and set them one in each of the booth to present booth activities to the audience i.e. issues what they had learnt in the FFS sessions. Four audience groups were advised to go to 4 booths to observe booth activities and to ask the presenter on their queries. Each group had 7 minutes time to observe one booth and to ask the questions. Then FO blow whistle to change each group their booth observation. In this way, the whole participants observed all the booths by around half an hour. Then, again they all came back to the discussion place.

FFD participants are observing booth activity

### 3.2 Experience Sharing by FFS Member

After completion of booths observation, the FO invited one male and one female FFS members to share their learning and experiences from involving with the FFS. They also discussed on new issues they had learnt from the FFS, talked on impact or benefits personally they had achieved by implementing learning of FFS. They also answered the queries/questions of the participants on FFS related issues.

In maximum cases, FFS participants informed that earlier they did not grow vegetables in bed; they had learnt benefits and importance of beds in growing vegetables from the FFS sessions. They had no experiences for growing Carrot & “Bati Shak” and even they did not taste

One female FFS member are sharing her learning and experiences in the FFD

Photo showing improved “Hazzal” with broody hen.

these two important vegetables earlier. They have tasted these 2 new vegetables and learnt how to grow these 2 vegetables with other vegetables as well. Many new things they had learnt from the FFS sessions like – homestead space planning, germination test, importance of thinning, pit preparation for vine crops, Farm Yard Manure preparation, importance of IPM and IPM techniques, hand pollination, importance of organic manure, fruit tree management they mentioned. Regarding poultry rearing, they shared, “Now, more or less, every FFS members have 3/4 times more poultry birds than before join in FFS”. They mentioned “For

poultry rearing, the importance things we have learnt from FFS are, timely & regular vaccination; early chicks separation; use of improved “Hazzal”; cleaned & properly aerated shed and need to provide supplement feeds to the birds”.

“Many things of our daily life we have learnt from FFS” they added. “We never heard the importance of “1000 days care” for mother & child health; importance of Moringa tree and separate diet for children, adolescent and pregnant/lactating mother and all these we have learnt from FFS” informed many of the FFS members during FFD. So, they thanked Blue Gold Program for such a nice initiative at village level. They urged for more FFS in their areas.

**One non-FFS member is expressing her ideas & views in the FFD.**

### 3.3 Views & Reaction by Non-FFS Participants

Then the Concern FO invited one or two non-FFS participants to say something on FFS activities in their vicinity. For time constraint, FO could not allow more than 2 non-FFS participants to provide their views & thinking on FFS issue. Maximum cases, they felt themselves as an unlucky person. Because, they could not join in the FFS as FFS was only for 25 persons. According to them, FFS activities are very helpful for the poor farmers. If possible, they suggested for more FFS in one WMG area. At two FFDs, they said, “I was very much interested to join the FFS but our family is relatively solvent and I was not selected for FFS”. “This criterion for selecting FFS member should be changed” they added.

### 3.4 Views of WMG Office Bearers

All EC members of WMG were invited to join in the FFD and WMG President and or Secretary including other executive members attended in every FFD. They highly appreciated the FFS activities of the Blue Gold Program. They cited some example by mentioning name of some farmers whose livelihood had been changed by joining with Farmer Field School. They appreciated activities of the FOs, their labour and their efforts to make the FFS successful. Some WMG ensured that they would take care of the FFS to continue its activities. They urged to all participants of FFD to continue the knowledge/learning they had from the FFS. WMG people also requested to concern FO to convey their wish, for implementing another FFS in their area, to the Management of Blue Gold Program.

**One WMG Executive member is sharing his idea and cherishing FFS activities in the FFD**

### 3.5 Certificate and Prize Distribution

Next activity of FFD was Certificate & Prize distribution. From the very beginning to the end of FFS, FO assess each and every FFS members on their activities like timely attendance, regularity, FFS suggestions followed, communication & liaison with Upazila line departments as well as with BGP, efforts for horizontal learning, above all, their performance and selected 3 persons from each of FFS group – 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup>. This initiative has created more attention & interest of the community people to work at homestead. The certificate was for all FFS members as the recognition her/his participation in the Farmer Field School and successful completion of all sessions of the FFS organized by Blue Gold Program. The initiative of Certificate for all FFS members was very much appreciated by the WMG executives. One WMG President has said, “After having 5 years class at high school & facing tough examination, I got a

**One WMG Secretary along with others is distributing Prize & Certificate to the FFS**

certificate, which is not as nice as yours one; which you have acquired by six month". "I like it and I appreciate Blue Gold Program to provide so nice certificate for all" he also added.

### 3.6 Closing of FFS and Formal Hand-over to WMG

Then the concern FO again got the floor and discussed all the things he had to perform to run the FFS and to make the FFS activities successful. At that time, he might have some tough word to the FFS members as well as to the community people. "What I have done, only for the betterment of you and for the betterment of the FFS, so, if I hart anyone during my tenure/FFS running period, please forgive me", said the FOs. "Today is the last day of FFS, from today & onward we may not communicate with you as before but definitely we will have some connection with you all periodically" he/she also added. "We are impressed and would like to appreciate the Executive Committee of WMG for their moral & physical support and cooperation to have and to establish such a nice and successful FFS. Ultimately, the WMG people is supposed to take care of the graduated FFS of their area to continue FFS activities", said the FOs. "We have prepared a report of FFS mentioning the sessions which had imparted in the FFS, participants list, name & cell number of the FFS leaders etc. and we would like to provide one copy of that report to the WMG, so that, they will have record and will monitor FFS activities easily", said the concern FO. Then he/she handed formally the report to President or to Secretary of WMG with a signed received copy for office. Format of report is enclosed with the report as **Annexure -2**.

Photograph showing part of a FFD

### 3.7 Closing of FFD and Refreshment

Then the Chairperson of the FFD (Maybe President or Secretary of WMG in some cases, local leaders) invited to conclude the FFD activities and formally close the session. In maximum cases, the Chairman appreciated the efforts from Blue Gold Program for the betterment of the polder dwellers. He urged, "please don't say good bye rather try to find out more scope to work for our poor community people". Mr. Chairman expected that coordination and cooperation between WMG and Blue Gold Program would be increased day by day. Then he thanked all the participants to join and to make the FFD successful and formally closed the FFD session. Before closing, he invited all participants for the refreshment arranged by the Blue Gold Program.

## 4. Conclusion

FFS Field Day – FFD is one of the important tools that enhance horizontal learning of community people for maximization of homestead production (Vegetables, fruits, fishes, poultry, livestock) i.e. learning of Farmer Field School. It also creates a scope to show the confidence of the FFS participants to explain to the FFD participants what they have learnt and what would be the improved agricultural practices for more production. In this FFS cycle-6, organization, arrangement and decoration of booths were very nice. During FFD, preparation & campaign for UP election was going on and that was why, in some FFD, peoples gathering was comparatively less than we expected. FOs had to organized 28 FFD in 9 days, which was really a tough job for them but that had been possible due to proper planning, timely logistic & material support, proper guidance and cooperation from other colleagues of zonal office. We appreciate all FOs their hard & sincere efforts to make the FFS and the FFDs successful. We are really grateful to the WMG people for their nice cooperation in establishing FFS & in imparting FFS sessions. We are also grateful to the community people of this area for their moral support which helped us to make the FFS activities successful as well as these successful FFD.
