

Blue Gold Program
Study Tour Program on Flood Control and Drainage System in Indonesia
19 to 27 April 2015

Introduction

Blue Gold is a collaboration program between the Government of the Netherlands (Donor) and the Government of Bangladesh. The program is implemented by the Ministry of Water Resources, through Bangladesh Water Development Board (BWDB, lead agency) and the Department of Agricultural Extension (DAE). The Study Tour Program on Flood Control and Drainage System in Indonesia was held in March 19-27, 2015 for 11 officials who are from BWDB Head Quarter, Field and from the Planning Ministry. The Program was organized by the Eoroconsult Mott MacDonald office, Indonesia.

The study tour program objectives was to help the BWDB officials enhancing knowledge over flood protection and improving the water distribution and drainage systems; the participants able to learn how to create an effective operational partnership between government agencies and community groups and to make a project sustainable.

The participants were visited Micro System and Flood Mitigation, Water Management and Agricultural Systems, Operation and Maintenances by the Water Users Groups in different project in Jakarta and Bali.
