Green corner – Save a tree today!

Mott MacDonald is committed to integrating sustainability into our operational practices and culture. As a world leading consultancy business we are always seeking to improve our own performance and reduce the environmental impact of our business. Meanwhile, many of our staff are committed to living sustainably in their personal lives – as an employee-owned company Mott MacDonald shares their concerns. We feel an ethical obligation to reduce our emissions and resource use and have committed to reducing our per capita carbon footprint by a minimum of 5% year on year.

We print our reports and client submissions using recycled, double-sided paper. Compared to printing single sided on A4 virgin paper, double sided printing on recycled paper saves the equivalent of two trees, over a ton of CO₂ and a cubic metre of landfill space for every 100 reams. By choosing the greener path we have been able to achieve efficiencies benefiting both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Going Green' initiative:

- When possible we scan rather than print and consider what really needs to be on paper
- We use electronic faxing when practicable
- We work on e-forms
- We use recycled paper when possible
- Reducing paper in the office creates a better working environment for our staff and our clients

We believe that you, as one of our esteemed clients, will share our concern to conserve precious resources for the benefit of our planet and its inhabitants.

Issue and revision record

Revision	Date	Originator	Checker	Approver	Description
V1	03/03/2018	MRL/Zonal Teams	Karel T'Jonck	Guy Jones	WP8C - First issue
V2	04/04/2018	MRL/Zonal Teams		Guy Jones	WP8C - Final

Working Papers are intended to explore the issues surrounding a particular aspect of the project (eg gender, BGP exit strategy, polder development planning, roles and functions of WMO organisations, water management, communications) in a form which allows discussion and comment within the project whilst remaining as a working draft - but with the eventual aim of issuing as a Technical or Thematic Report when the process of internal interrogation and refinement has resulted in a product which has wider application. A WP is not intended to be an action plan or progress report, but a discussion of issues and processes and the reasons behind what we are doing in the project.

This document is issued for the party which commissioned it and for specific purposes connected with the above-captioned project only. It should not be relied upon by any other party or used for any other purpose.

We accept no responsibility for the consequences of this document being relied upon by any other party, or being used for any other purpose, or containing any error or omission which is due to an error or omission in data supplied to us by other parties

This document contains confidential information and proprietary intellectual property. It should not be shown to other parties without consent from us and from the party which commissioned it.

Executive Summary

1. This report covers the third round of participatory monitoring (PM), conducted by WMGs during the period October to November 2017. Through this exercise, the WMGs assessed their own performance against potential targets at outcome level, which we refer to as outcome challenges. In essence, participatory monitoring encourages WMGs to be aware of potential targets and to evaluate their performance (progress or shortcomings) towards a full achievement of those targets.
2. A total of 352 WMGs of 14 polders participated in the PM exercise. The WMGs assessed their progress against 17 outcome challenges under 3 themes and indicated the progress they achieved vis-à-vis the outcome challenges by using scores.
3. A revised set of outcome challenges have been used for this round of PM. The outcome challenges were revised to reinforce the functionality indicators now used across the Blue Gold Program. The reaction of WMGs regarding the PM format with the revised set of outcome challenges is positive. WMGs can more easily relate these outcome challenges to activities in their everyday life.
4. Based on the progress they reported, WMGs have been ranked in 5 performance grades – ‘A’ if the overall achievement is > or = 80%; ‘B’ if the overall achievement is between 70 and 79%; ‘C’ if the overall achievement is between 60 and 69%; ‘D’ if the overall achievement is between 50 and 59%; and ‘E’ if the overall achievement is < 50%.
5. The results of PM show that performance grade of about 22% of the total number of WMGs is ‘A’, overall achievement being 80% or more, while 10% WMGs belong to ‘E’ grade with overall achievement of 50% or less. It is noteworthy that performance levels of about 75% of the total number of WMGs are of 3 top grades (‘A’, ‘B’ & ‘C’) as per WMGs’ self-assessment, and about 83% as per assessment of Polder Teams.
6. As per their self-assessment, the progresses of WMGs have been quite remarkable in 4 polders - Polders 22, 30, 43/2D and 43/2F.
 - 10 out of 12 WMGs of Polder 22 belong to the top 2 performance groups, with 7 WMGs in grade ‘A’;
 - all 40 WMGs of Polder 30 belong to the top 2 performance groups, with 30 of them in the topmost level of performance;
 - 24 out of 28 WMGs of Polder 43/2D belong to the top 2 performance groups, with 14 of them at the highest level of performance; and,
 - 25 out of 27 WMGs of Polder 43/2F belong to the top 2 performance groups, with 11 of them at the highest level of performance.

1. Introduction

1.1 Background to Blue Gold Program

Blue Gold Program (BGP) contributes to 'reducing poverty in coastal polders by creating a healthy living environment and a sustainable socio-economic development'¹. To this end the program sets up two types of activities: water management support activities and agriculture/fisheries production and market development support activities. Water management support activities include development and repair of water management infrastructures of selected polders and strengthening of water management partnerships, while agriculture/fisheries and market development support activities including technology transfer in agriculture/fisheries and strengthening of market linkages.

The project activities are expected to bring systemic changes in the existing situation. Water management support activities will stimulate equitable water management, where water management partnerships will be active so that water resources are managed effectively. Complementary to this, the agriculture/fisheries and market development support activities will generate strengthened value chains, where farmers will harvest more productive, profitable and diversified productions by adopting new technologies and practices with support from technology transfer services and commensurate market linkage developments. This is the outcome level in the results chain leading towards the ultimate target of Blue Gold Program.

Because changes at impact level and eventually at goal level will only occur if they are sustained at outcome level, monitoring is carried out at outcome level. Outcome mapping is necessary to see whether the expected changes are taking place, and whether they are developing into sustainable changes.

1.2 Purpose of Participatory Monitoring

Within Blue Gold, participatory monitoring (PM) encourages water management groups (WMGs) to be aware of the potential targets for their development and to evaluate their progress (or shortcomings) towards a full achievement of those targets. Based on their monitoring results, the WMGs can adjust their own plan of actions to sustain progresses achieved and set further improvements.

Participatory Monitoring provides the field staff a first-hand insight into the WMG's leadership perception of their own performance and upon reflection offers an opportunity to diagnose progress in more depth and consider the identification of further interventions and the facilitation thereof.

¹Inception Report, Blue Gold Program, 2013.

2. Methodology

2.1 Participatory Monitoring Tool

A format with monitoring parameters is used as the participatory monitoring tool. The monitoring parameters are potential targets for development of WMG at outcome level, thus also called outcome challenges. A revised set of monitoring parameters have been used for this round of PM. The monitoring parameters used in previous rounds of PM were revised to reinforce the functionality indicators now used across Blue Gold Program, and to overcome some particular problems or confusions in the previous format e.g. to remove references to MFS outcome challenges since BGP has not held MFSs in all polders. For this round of participatory monitoring, a total of 17 outcome challenges under three themes have been identified as monitoring parameters (see **Annex 1**).

The three themes are:

- (a) agriculture and economic development
- (b) water management (operation and maintenance of infrastructures); and
- (c) water management group and water management partnership,

The achievement of a WMG against each of the 17 outcome challenges is ranked on a scale of 4 progress levels:

- 0 = No progress
- 1 = Limited progress
- 2 = Improved progress
- 3 = Full achievement

Each of the four progress levels is provided with a simple and clear definition, i.e. progress marker, so that WMGs can distinguish through internal discussion and reasoning which level they have achieved. The progress markers provide definitions of a set of idealized targets for WMGs. Monitoring by the WMGs of the progress achieved towards these targets then generate firsthand information on systemic changes, which can in turn be used to plan appropriate actions.

The language (Bangla) of the format has been kept as simple as possible and where the words and phrases with special connotations have been used, they have been explained alongside those words and phrases with examples from day-to-day life. The feedback from WMGs on the PM format with the revised set of monitoring parameters has been encouraging – it appears that they feel more comfortable with the revised monitoring parameters than the previous ones; WMGs can more easily relate these parameters with realities and activities of their everyday life.

2.2 Participatory monitoring exercise

Participatory Monitoring was conducted by WMGs of 14 Blue Gold polders during October–November 2017. A total of 352 WMGs participated in this round of participatory monitoring exercise. CDFs were present in the participatory monitoring sessions of most WMGs in case the latter required any clarifications on the monitoring parameters – the outcome challenges and progress markers.

The WMGs assessed their progress vis-à-vis 17 outcome challenges under 3 themes as reflected in the PM format. They discussed the outcome challenges, the potential targets of their development, and progress markers thoroughly and marked their achievements/progress levels by putting scores.

2.3 Reflection on participatory monitoring results

After the results of participatory monitoring were analyzed, the MRL Team shared the results with all polder teams in separate meetings and reviewed/reflected upon the results together. The polder teams actively and spontaneously participated in discussion; they shared their views on the assessment of WMGs as well as gave their assessment of the progress/performance of WMGs.

As recommended by the ARM 2017, the polder teams were advised to encourage the WMG Executive Committees to share with the general members ‘the potential targets of WMG’ as reflected in PM format and the monitoring results at (annual/quarterly) general meetings of WMGs.

2.4 Limitations

- A number of CDFs who looked after WMGs in different polders have been transferred to other polders so that the reflection on participatory monitoring results was not enriched to the fullest possible extent.
- Due to the changes in the monitoring parameters, it will not be possible to compare the results of this round of PM with those of the earlier rounds, and, for the same reason, the progress of WMGs over time cannot be shown.

3. Project Overview

3.1 Present Status of WMGs

The degree of achievement or progress of WMGs vis-à-vis the outcome challenges, which may alternatively be called performance levels of WMGs, have been determined by the WMGs themselves i.e. through their self-assessment. Basing on the scores they gave against the monitoring parameters, the WMGs have been ranked in 5 performance levels, using letter grades:

- A =overall average achievement is $\geq 80\%$;
- B =overall average achievement is between 70 and 79%;
- C =overall average achievement is between 60 and 69%;
- D =overall average achievement is between 50 and 59%;
- E =overall average achievement is $< 50\%$.

It is normal to expect that WMGs of older polders will have better performance levels than those of relatively newer polders though in reality it may not be the case always. Table-1 shows how old different polders are in consideration of the starting dates of BGP interventions².

Table-1: Starting dates of BGP interventions

<i>Starting Date of BGP Intervention</i>	<i>Polders</i>
June 2013	Polders 22, 30, 43/2D and 43/2F
August 2013	Polders 43/2A, 29, 43/1A, 43/2B, 43/2E and 26
April 2014	Polder 31 part
August 2014	Polder 2
August 2015	Polders 55/2A and 55/2C

The following table shows the numbers of WMGs of 14 polders falling under different grades, indicating their performance levels. In Table-2 polders have been arranged in the order of starting dates of BGP interventions.

² Community mobilization activity has been the first BGP intervention in all polders.

Table-2: Distribution of WMGs as per performance levels

Performance levels (Grades)	Polder-wise no. and % of WMGs as per performance levels*														
	22	30	43/2D	43/2F	43/2A	29	43/1A	43/2B	43/2E	26	31 Part	2	55/2A	55/2C	All polders
A	7 (59)	30 (75)	14 (50)	11 (41)	1 (5)	5 (9)	2 (14)	7 (25)	–	1 (7)	–	1 (2)	–	–	79 (22)
B	3 (25)	10 (25)	10 (36)	14 (52)	2 (9)	22 (40)	3 (21)	4 (14)	4 (33)	6 (40)	2 (17)	3 (5)	–	4 (25)	87 (25)
C	1 (8)	–	4 (14)	1 (4)	11 (50)	23 (42)	4 (29)	10 (36)	4 (33)	8 (53)	8 (66)	16 (28)	3 (23)	7 (44)	100 (28)
D	1 (8)	–	–	–	6 (27)	5 (9)	5 (36)	3 (11)	4 (33)	–	2 (17)	20 (34)	1 (8)	5 (31)	52 (15)
E	–	–	–	1 (4)	2 (9)	–	–	4 (14)	–	–	–	18 (31)	9 (69)	–	34 (10)
Total	12 (100)	40 (100)	28 (100)	27 (100)	22 (100)	55 (100)	14 (100)	28 (100)	12 (100)	15 (100)	12 (100)	58 (100)	13 (100)	16 (100)	352 (100)

*The figures in parentheses indicate % of WMGs in reference to total no. of WMGs in respective polders.

The detailed results of self-assessment by WMGs are given polder-wise in Sections 4. The polder teams by and large agree with the results of self-assessment by the WMGs; the polder teams observed that in general the WMGs have done well in their self-assessment. Nonetheless, there are some WMGs that have over-rated their achievements and some others have under-rated their achievements. Again, there are some WMGs that are unwilling to put high scores (even when their achievements are high) because they think that BGP may withdraw its support from them if BGP sees that they are doing well or for fear that they may lose their eagerness/enthusiasm for further improvement in complacent over their achievement. The difference between WMGs’ self-assessment and polder teams’ assessment is shown in the following table; details of the variations are shown in Section 4.

Table 3: Distribution of WMGs into performance groups as per WMGs’ self-assessment and polder teams’ assessment

Performance levels (Grades)	No. and percentage of WMGs belonging to different performance groups			
	Self-assessment by WMGs		Assessment by Polder Teams	
	No.	%	No.	%
A	79	22.44%	72	20.45%
B	87	24.72%	123	34.94%
C	100	28.41%	100	28.41%
D	52	14.77%	36	10.23%
E	34	9.66%	21	5.97%

The charts below show the distribution of 352 WMGs into performance groups.

Source: Self-assessment by WMGs

Source: Polder Team's assessment

It is noteworthy that performance levels of about 75% of the total number of WMGs are of 3 top grades ('A', 'B' & 'C') as per WMGs' self-assessment, and about 83% as per assessment of Polder Teams.

3.2 Poor Performance Areas of WMGs

From the PM results it appears that, as they assessed their achievements or progress with respect to 17 outcome challenges, the WMGs realized that they are weak on certain aspects and, therefore, they put low scores. The following table gives a picture of how many WMGs (out of 352 which participated in PM) are weak with respect to which outcome challenges.

Table 4: Outcome challenges, with reference to which the WMGs have put low scores (0 or 1):

Sl. No.	Outcome Challenges	No. of WMGs that have put low scores
1	1.7 Farmers undertake collective actions for agricultural activities	203
2	2.5 WMG has created O&M fund and it uses the fund as per its plan for O&M	178
3	2.1 BWDB has carried out appropriate maintenance work of water management infrastructures	100
4	2.3 WMG carries out 'Routine Maintenance' of all infrastructures of the area	97
5	2.4 Local people are participating in the operation of water management infrastructures under the leadership of WMG by contributing necessary resources	85
6	2.6 People of the WMG area, under the leadership of WMG and with cooperation of BWDB and UP, take care of water requirements of highland and lowland of the area	81
7	2.2 No infrastructure of the area is under illegal occupation	65
8	1.3 Male and female farmers of the area have adopted modern	62

Sl. No.	Outcome Challenges	No. of WMGs that have put low scores
	technologies/methods for poultry & livestock rearing	
9	3.2 WMG regularly updates its accounts and other books of records and presents them in meetings	61
10	3.3 WMG engages in water management related activities jointly with government & non-government organizations and LGIs	58
11	1.5 In Rabi & Kharif-1 seasons the potential cultivable lands of the area are brought under cultivation	55
12	3.1 WMG has actively formulated the WMG action plan (WAP) and implements it	50
13	1.2 Male and female farmers of the area have adopted modern technologies for fish cultivation	49
	1,4 Synchronization in cultivation of crops and crop varieties is practiced in the area	49
15	3.4 There is no conflict relating to use of water and water management in the WMG area	22
16	1.1 Male and female farmers of the area have adopted modern agricultural technologies for crop cultivation, including cultivation of high yielding varieties and high value crops, use of modern crop cultivation methods	21
17	1.6 In Kharif-2/Aman season the potential cultivable lands of the area are brought under (crop or fish) cultivation.	15

By far the most common weakness of WMGs is the low interest in collective actions for agricultural activities, and, as a theme, the water management (ie operation and maintenance of infrastructure) is the most unheeded area. The WMGs need to be encouraged to give special attention to these areas. It may also be noted that as many as 100 WMGs point towards poor periodic maintenance of infrastructures, which is to be done by BWDB.

4. Polder Overview

Polder-wise results of participatory monitoring are given in this section. While the Polder Teams agree with WMGs' self-assessment to a large extent, there are some disagreements as well, as noted earlier. As the assessment results are reported below polder-wise, the performance level of each WMG has been shown by using a letter grade; if and where the concerned Polder Team holds different view as regards overall achievement of a WMG, it has been indicated in the next column.

4.1 Polder 22

As per their own assessment, 10 out of 12 WMGs of this polder belong to the top 2 performance groups, with 7 WMGs in grade 'A'. Thus, as may be expected for being one of the old BGP polders, the progress of WMGs in general is reasonably good. This is one of the four polders -others being Polders 30, 43/2D and 43/2F- that are excelling in terms of number of WMGs falling under the top 2 performance groups. The assessment of the Polder Team relating to performance of WMGs of this polder is very close to that of the WMGs' self-assessment. However, the Polder Team differs somewhat with the results of self-assessment by WMGs in two instances; in Polder Team assessment Darun Mallik's performance/progress level is of grade 'B' and not 'A' as the WMG ranks its progress, and Kalinagar's performance level is of grade 'C' as opposed to WMG's own rating, i.e. grade 'D'.

WMG ID	Name of WMG	Theme-wise Progress of WMGs on a Scale of 0 to 3 Progress Levels(and in %)			Average score (out of max. score 3) and overall achievement in %	Level of WMG performance (indicated by letter grades)	
		Agriculture and economic development	Water Management (Operation and Maintenance of Infrastructures)	Water Management Group and Water Management Partnership		Self-assessment by WMGs	Polder Team's Assessment (indicated where it differs)
47221	Bigardana	2.14 (71.43%)	2.17 (72.22%)	3.00 (100.00%)	2.35 (78.43%)	B	
47222	Darun Mallik	2.43 (80.95%)	2.67 (88.89%)	2.75 (91.67%)	2.59 (86.27%)	A	B
47223	Durgapur	2.57 (85.71%)	2.50 (83.33%)	2.50 (83.33%)	2.53 (84.31%)	A	
47224	Fulbari	2.43 (80.95%)	2.50 (83.33%)	2.75 (91.67%)	2.53 (84.31%)	A	
47225	Gopepagla	2.29 (76.19%)	2.67 (88.89%)	1.75 (58.33%)	2.29 (76.47%)	B	
47226	Harinkhola	2.71 (90.48%)	2.67 (88.89%)	2.50 (83.33%)	2.65 (88.24%)	A	
47227	Hatbari	2.57 (85.71%)	2.50 (83.33%)	3.00 (100.00%)	2.65 (88.24%)	A	
47228	Kalinagar	1.86 (61.90%)	1.17 (38.89%)	2.00 (66.67%)	1.65 (54.90%)	D	C
47229	Noai	2.14 (71.43%)	1.83 (61.11%)	2.25 (75.00%)	2.06 (68.63%)	C	

WMG ID	Name of WMG	Theme-wise Progress of WMGs on a Scale of 0 to 3 Progress Levels (and in %)			Average score (out of max. score 3) and overall achievement in %	Level of WMG performance (indicated by letter grades)	
		Agriculture and economic development	Water Management (Operation and Maintenance of Infrastructures)	Water Management Group and Water Management Partnership		Self-assessment by WMGs	Polder Team's Assessment (indicated where it differs)
472210	Saidkhali	2.71 (90.48%)	2.33 (77.78%)	2.25 (75.00%)	2.47 (82.35%)	A	
472211	Senerber	2.71 (90.48%)	2.50 (83.33%)	2.25 (75.00%)	2.53 (84.31%)	A	
472212	Telikhali	2.43 (80.95%)	2.17 (72.22%)	2.25 (75.00%)	2.29 (76.47%)	B	

4.2 Polder 30

As per their own assessment, all 40 WMGs of this polder belong to top 2 performance groups, with 30 of them in the topmost level of performance. Thus, we have a picture of impressive progress of WMGs; this is the kind of progress that BGP would like to see in all polders. This is one of the four polders - others being Polders 22, 43/2D and 43/2F - that are excelling in terms of number of WMGs falling under 2 top performance groups. The Polder Team, however, ranks 36 WMGs in the top 2 performance groups and only 15 of them at the highest performance level. The most common outcome challenge where many WMGs feel that their performance is still poor is 'undertaking collective action in agricultural activities'; the other outcome challenge identified by a number of WMGs as poor performance area is the 'creation of O&M fund'.

WMG ID	Name of WMG	Theme-wise Progress of WMGs on a Scale of 0 to 3 Progress Levels (and achievement in %)			Average score (out of max. score 3) and overall achievement in %	Level of WMG performance (indicated by letter grades)	
		Agriculture and economic development	Water Management (Operation and Maintenance of Infrastructures)	Water Management Group and Water Management Partnership		Self-assessment by WMGs	Polder Team's Assessment (indicated where it differs)
47301	Amtala Kodaldaha	2.14 (71.43%)	2.50 (83.33%)	2.75 (91.67%)	2.41 (80.39%)	A	B
47302	Andharia Khejurtala	2.57 (85.71%)	2.17 (72.22%)	2.75 (91.67%)	2.47 (82.35%)	A	
47303	Auskhali	2.43 (80.95%)	2.17 (72.22%)	2.50 (83.33%)	2.35 (78.43%)	B	
47304	Baguladanga -Patharghata	2.29 (76.19%)	2.17 (72.22%)	2.50 (83.33%)	2.29 (76.47%)	B	
47305	Bajeafti Debitala	2.57 (85.71%)	2.33 (77.78%)	2.00 (66.67%)	2.35 (78.43%)	B	
47306	Balabunia	2.57 (85.71%)	2.83 (94.44%)	3.00 (100.00%)	2.76 (92.16%)	A

4.3 Polder 43/2D

As per their own assessment, 24 out of 28 WMGs of this polder belong to 2 top performance groups, with 14 of them in the highest level of performance/progress. The Polder Team's assessment fully matches with WMGs' self-assessment. This is one of the four polders -others being Polders 22, 30 and 43/2F- that are excelling in terms of number of WMGs falling under 2 top performance groups. However, the participatory monitoring results show that most WMGs are weak with regard to the outcome challenge labeled as 'O&M fund creation' and some WMGs report that they are weak in 'collective actions for agricultural activities'.

4.4 Polder 43/2F

As per their own assessment, 25 out of 27 WMGs of this polder belong to 2 top performance groups, with 11 of them in the highest level of performance. In Polder Team's assessment, however, 26 WMGs belong to the top 2 performance groups, with 14 of them in the highest performance group. This is one of the four polders -others being Polders 22, 30 and 43/2D- that are excelling in terms of number of WMGs falling under 2 top performance groups. Though the overall ratings of most WMGs are commendable, they identify their weakness especially with respect to 'collective actions for agricultural activities' and 'O&M fund creation'.

4.5 Polder 43/2A

As per their own assessment, 3 out of 22 WMGs of this polder belong to top 2 performance groups, with 1 of them in the highest performance level, and in Polder Team's assessment 7 WMGs belong to the top 2 performance groups. Considering the fact that this is one of the old polders, one would expect more WMGs in the top 2 performance groups. The results of self-assessment of WMGs seem to indicate that (benefit of) collective actions in agricultural activities are not generally occurring here. Other outcome challenges identified by a number of WMGs as poor performance areas are 'creation of O&M fund' and 'water management partnership with BWDB and UP'; .The WMGs also report that there has been not enough maintenance of water management infrastructures by BWDB.

4.6 Polder 29

As per their own assessment, 27 out of 55 WMGs of this polder which participated in PM exercise, belong to top 2 performance groups, with 5 in the topmost level of performance. One WMG did not participate in PM exercise. The Polder Team thinks that the progress of WMGs is better than what WMGs themselves have shown to have achieved – in the Polder Team’s assessment 33 WMGs belong to the top 2 performance groups. The most common outcome challenge or potential target area where many WMGs feel that their performance is poor is ‘undertaking collective action in agricultural activities’. Other outcome challenges commonly identified by a number of WMGs as poor performance areas include ‘bringing potential cultivable land under cultivation during Kharif-1 and Rabi seasons’, ‘adoption of modern technologies in poultry and livestock rearing’, ‘creation of O&M fund’, and ‘keeping infrastructures free from illegal occupation’.

4.7 Polder 43/1A

As per their own assessment, 5 out of 14 WMGs of this polder belong to 2 top performance groups, with 2 of them in grade 'A' progress level. In Polder Team's assessment, however, 8 WMGs belong to the top 2 performance groups. The participatory monitoring results show that most WMGs of the polder feel that they are weak with respect to outcome challenges under water management theme, especially as regards 'creation of O&M fund', 'water management partnership with BWDB and UP' and 'participation in operation and maintenance'. The WMGs also report that there has been not enough maintenance of water management infrastructures by BWDB.

4.8 Polder 43/2B

As per their own assessment, 11 out of 28 WMGs of this polder belong to top 2 performance groups, with 7 of them in the highest level of performance. In Polder Team's assessment, however, 13 WMGs belong to the top 2 performance groups. The participatory monitoring results show that an outcome challenge of which many WMGs feel that their performance is poor is 'undertaking collective action in agricultural activities'; other outcome challenges commonly identified by a number of WMGs as poor performance areas include 'adoption of modern technology in poultry and livestock rearing'; adoption of modern technology in fish cultivation', 'bringing under cultivation the potential cultivable lands during Kharif-1 & Rabi seasons', 'O&M fund creation' and 'water management partnership with BWDB and UP'.

4.9 Polder 43/2E

In their own assessment, out of 12 WMGs of the polder, no WMG is ranked at grade 'A' while performance level of 4 WMGs is of grade 'B'; considering the fact that this is one of the old polders, one would expect to see at least some WMGs in the top performance groups. Among other WMGs 4 are of grade 'C' and 4 are of grade 'D'. The participatory monitoring results show that a number of WMGs of the polder feel that they are weak with respect to the outcome challenges under water management theme, especially 'creation of O&M fund', 'participation in operation of water management infrastructure through cash/kind contribution', 'participation in routine maintenance of infrastructure', and 'water management partnership with BWDB and UP'; the WMGs also report that there has been not enough maintenance of water management infrastructures by BWDB. The self-assessment results also show that a number of WMGs are weak with respect to 'adoption of modern technologies for poultry and livestock rearing' and 'adoption of modern technologies for fish cultivation'.

4.10 Polder 26

As per their own assessment, 7 out of 15 WMGs of this polder belong to 2 top performance groups, with 1 of them in the highest level of performance. In Polder Team's assessment, however, 11 WMGs belong to the top 2 performance groups, with 4 of them in the highest performance group. The participatory monitoring results show that a number of WMGs of the polder feel that they are weak with respect to some outcome challenges, especially as regards 'creation of O&M fund', and 'collective action for agricultural activities'.

4.11 Polder 31 Part

In their own assessment, out of 12 WMGs of the polder, no WMG is ranked at ‘A’ grade while performance level of 2 WMGs is of grade ‘B’. In Polder Team’s assessment also there is no WMG of ‘A’ grade but 7 WMGs have been ranked in grade ‘B’..

The participatory monitoring results show that under ‘agriculture and economic development’ theme a number of WMGs feel that they are weak with respect to the outcome challenges of ‘collective actions for agricultural activities’ and ‘potential cultivable land in Kharif-1 and Rabi seasons are brought under cultivation’. Other areas/outcome challenges where a number of WMGs have poor progress include ‘O&M fund creation’ and ‘keeping water management infrastructures free from illegal occupation’.

4.12 Polder 2

As per their own assessment, 4 out of 58 WMGs of this polder belong to 2 top performance groups, with 1 of them in the highest level of performance, while 18 WMGs rank themselves in ‘E’ grade. In Polder Team’s assessment, however, 12 WMGs belong to the top 2 performance groups and 6 WMGs in ‘E’ grade.

Many WMGs of the polder feel that they are weak with respect to a number of outcome challenges, the most common poor performance areas being: ‘collective actions for agricultural activities’, ‘synchronization in crop cultivation’, ‘participation in operation and maintenance’, ‘creation of O&M fund’, ‘formulation and implementation of WAP’, and ‘partnership with other stakeholders for water management;’. The WMGs also report that there has been not enough maintenance of water management infrastructures by BWDB.

4.13 Polder 55/2A

In their own assessment, out of 13 WMGs of the polder, which participated in participatory monitoring exercise, no WMG is ranked in grades 'A' or 'B'. Most (9) of the WMGs are ranked in 'E' grade in their self-assessment, while the Polder Team rank 8 WMGs in 'E' grade. As per their self-assessment, many WMGs of the polder feel that their performance is still poor with respect to most of the outcome challenges under all three themes. Besides, all the WMGs report that there has been not enough maintenance of water management infrastructures by BWDB; water management infrastructures are in poor condition - sluices are not in functional condition and almost all khals are silted up.

WMG ID	Name of WMG	Theme-wise Progress of WMGs on a Scale of 0 to 3 Progress Levels (and achievement in %)			Average score (out of max. score 3) and overall achievement in %	Level of WMG performance (indicated by letter grades)

4.14 Polder 55/2C

In their own assessment, out of 16 WMGs of the polder, no WMG is ranked in ‘A’ grade, while performance level of 4 WMGs is of grade ‘B’, 7 WMGs of grade ‘C’ and 5 WMGs of grade ‘D’; there is no WMG whose performance level is of ‘E’ grade. Considering the fact that this is one of the new polders, the progress of WMGs is commendable. In the assessment of the Polder Team the progress of WMGs is even better – 4 WMGs are ranked in grade ‘B’, 10 WMGs in grade ‘C’ and 2 WMGs in grade ‘D’.

The participatory monitoring results show that a number of WMGs of the polder feel that they are weak with respect to outcome challenges under water management theme, especially ‘participation in routine maintenance of infrastructure’, and ‘water management partnership with BWDB and UP’; the WMGs also report that there has been not enough maintenance of water management infrastructures by BWDB.

5. Final Remarks

- The polder teams observed that in general the WMGs have done well in their self-assessment.
- The feedback from WMGs on the PM format with the revised set of outcome challenges is that they feel more comfortable with the revised monitoring parameters than the previous ones; WMGs can more easily relate these parameters with realities and activities of their everyday life.
- As a revised set of monitoring parameters have been used for this round of PM, the results of PM of this round could not be compared with those of previous rounds and, therefore, the trend of progress of WMGs over time could not be traced.
- It is important that participatory monitoring results are discussed and reflected upon by WMGs in their meetings, and make appropriate action plans for improvement; the polder teams should encourage and stimulate the WMGs to do this.
- The polder teams should also stimulate the WMG Executive Committees to share with the general members 'the potential targets of WMG' as reflected in PM format as well as the monitoring results at (annual/quarterly) general meetings of WMGs.
- The most common weakness of WMGs is the least aptitude towards collective actions for agricultural activities, and, as a theme, the water management (i.e., operation and maintenance of infrastructure) is the most unheeded area. The WMGs need to be encouraged to give special attention to these areas.

Annex-1: Outcome Challenges and Progress Markers

**Blue Gold Program
Bangladesh Water Development Board
Participatory Monitoring**

**Name of WMG: Polder No. No. of HHs in WMG Area:
No. of Participants:- Female: Male: (Total:) Date of Monitoring:**

Outcome Challenges		Progress Markers				Score	Remarks
		0	1	2	3		
1. Agriculture and economic development							
1.1	Male and female farmers of the area have adopted modern agricultural technologies for crop cultivation, including cultivation of high yielding varieties and high value crops, use of modern crop cultivation methods.	Male and female farmers of the area are not showing interest to adopt modern agricultural technologies for crop cultivation.	About 20% male and female farmers of the area have adopted modern agricultural technologies for crop cultivation.	About 40% male and female farmers of the area have adopted modern agricultural technologies for crop cultivation.	About 60% or more male and female farmers of the area have adopted modern agricultural technologies for crop cultivation.		

Outcome Challenges		Progress Markers					Score	Remarks
		0	1	2	3			
1.2	Male and female farmers of the area have adopted modern technologies for fish cultivation (like preparation of pond, selection of right varieties of fish, fish feed, use of fertilizer and lime, etc) ,.	Male and female farmers of the area are not showing interest for adoption of modern technologies for fish cultivation.	About 20% male and female farmers of the area have adopted modern technologies for fish cultivation..	About 40% male and female farmers of the area have adopted modern technologies for fish cultivation..	About 60% or more male and female farmers of the area have adopted modern technologies for fish cultivation..			
1.3	Male and female farmers of the area have adopted modern technologies/methods for poultry & livestock rearing. (Technologies of livestock rearing are like giving urea, molasses, straw as feed, deworming, etc; and for poultry rearing – use of <i>hajol</i> , well-ventilated house, separating chicks from mother bird, examining eggs, etc.)	Male and female farmers of the area are not showing interest for adoption of modern technologies/ methods for poultry & livestock rearing	About 20% male and female farmers of the area have adopted modern technologies/ methods for poultry & livestock rearing.	About 40% male and female farmers of the area have adopted modern technologies/ methods for poultry & livestock rearing.	About 60% or more male and female farmers of the area have adopted modern technologies/ methods for poultry & livestock rearing.			
1.4	Synchronization in cultivation of crops and crop varieties is practiced in the area.	There is no synchronization in cultivation of crops and crop varieties in the area.	In about 20% area there is synchronization in cultivation of crops and crop varieties.	In about 40% area there is synchronization in cultivation of crops and crop varieties.	In about 60% area there is synchronization in cultivation of crops and crop varieties.			
1.5	In Rabi & Kharif-1 seasons (dry months) the potential cultivable lands of the area (i.e. the lands where fresh water is available for crops) are brought under cultivation.	In Rabi & Kharif-1 seasons all potential cultivable lands remain fallow.	About 20% of the potential cultivable lands in dry months are brought under cultivation.	About 40% of the potential cultivable lands in dry months are brought under cultivation.	About 60% of the potential cultivable lands in dry months are brought under cultivation.			
1.6	In Kharif-2/Aman season the potential cultivable lands of the area are brought under	In Kharif-2/Aman season all potential cultivable lands	About 20% of the potential cultivable lands in Kharif-2/	About 40% of the potential cultivable lands in Kharif-2/	About 60% of the potential cultivable lands in Kharif-2/			

Outcome Challenges		Progress Markers					
		0	1	2	3	Score	Remarks
	(crop or fish) cultivation.	remain fallow.	Aman season are brought under (crop or fish) cultivation.	Aman season are brought under (crop or fish) cultivation.	Aman season are brought under (crop or fish) cultivation.		
1.7	WMG Members/Farmers undertake collective actions for agricultural activities (like collectively organizing for land preparation, buying inputs, irrigation, fish cultivation, etc).	Farmers do not undertake collective actions for agricultural activities.	Only about 10% undertake collective actions for agricultural activities.	About 20% farmers undertake collective actions for agricultural activities.	About 30% or more farmers undertake collective actions for agricultural activities.		
2. Water Management (Operation and Maintenance of Infrastructures)							
2.1	BWDB has carried out appropriate maintenance work (i.e. periodic & emergency maintenance) of water management infrastructures (sluice/outlet/inlet/khal) whereby facilities have been created for improved water management.	Water management infrastructures have not been maintained by BWDB for long time.	Water management infrastructures of the area have been partially maintained by BWDB but that is much less than the requirement.	Some of the water management infrastructures of the area have been maintained well by BWDB and thus water management facilities have been created for some parts of the area.	All the water management infrastructures of the area have been maintained well by BWDB whereby facilities have created for improved water management for most part of the area.		
2.2	No infrastructure of the area (sluice, embankment, khal, inlet, outlet) is under illegal occupation	The infrastructures of the area (active khal & other infrastructures) are under illegal occupation.	Some of the infrastructures are free from illegal occupation but they are much less than the requirement.	The main infrastructures (sluice, main khal and embankment) of the area are free from illegal occupation; only minor infrastructures are still under illegal occupation.	No infrastructure of the area is under illegal occupation.		
2.3	WMG carries out ` 'Routine Maintenance' of all infrastructures of the area	WMG does not carry out 'Routine Maintenance'.	WMG carries out 'Routine Maintenance' of	WMG carries out ` 'Routine Maintenance' of	WMG carries out ` 'Routine Maintenance' of all		

Outcome Challenges		Progress Markers					Score	Remarks
		0	1	2	3			
	(like greasing of sluice/outlet/inlet, changing nuts & bolts and cleaning of khal) whereby facilities are created for improved water management.		some infrastructures of the area but that is much less than the requirement.	most infrastructures of the area.	infrastructures of the area whereby facilities are created for improved water management.			
2.4	Local people are participating in the operation of water management infrastructures under the leadership of WMG by contributing necessary resources (cash, materials or labour).	Local people do not participate in the operation of water management infrastructures.	Under the leadership of WMG the local people participate in the operation of some water management infrastructures.	Under the leadership of WMG, the local people participate in the operation of most water management infrastructures.	Under the leadership of WMG, the local people are participating in the operation of all water management infrastructures..			
2.5	The WMG has created O&M fund and it uses the fund as per its plan for O&M.	The WMG does not collect O&M fund.	Only a few persons have participated in fund creation for O&M.	Most people of the area participated in fund creation for O&M and they use the fund as required.	The WMG is enriching the O&M fund on a regular basis and it uses the fund as per its plan for O&M.			
2.6	People of the WMG area, under the leadership of WMG and with cooperation of BWDB and UP, take care of water requirements of highland and lowland of the area.	People of the WMG area do not take care of water requirements of highland and lowland.	People of the WMG area, under the leadership of WMG and with cooperation of BWDB and UP, address water requirements of 20% highland and lowland of the area.	People of the WMG area, under the leadership of WMG and with cooperation of BWDB and UP, address water requirements of 40% highland and lowland of the area.	People of the WMG area, under the leadership of WMG and with cooperation of BWDB and UP, address water requirements of 60% or more highland and lowland of the area.			
3. Water Management Group and Water Management Partnership								
3.1	WMG has actively formulated the WMG action plan (WAP) and implements it.	WMG has not formulated WAP.	WMG has formulated WAP but is weak in its implementation.	WMG has formulated WAP; but its endeavor or capacity to	WMG has formulated a comprehensive WAP and it implements the WAP.			

Outcome Challenges		Progress Markers					
		0	1	2	3	Score	Remarks
				implement the WAP is still limited.			
3.2	The WMG regularly updates its accounts and other books of records and presents them in meetings.	The WMG does not update its accounts and other books of records.	The WMG updates its accounts and other books of records but not on regular basis.	The WMG regularly updates its accounts and other books of records but it does not present the accounts in meetings.	The WMG regularly updates its accounts and other books of records and presents them in meetings.		
3.3	The WMG engages in water management related activities (like planning and implementation of works related to operation & maintenance of water management infrastructures, emergency repair of infrastructures, resolution of conflicts related to water management, etc) jointly with government & non-government organizations and LGIs.	The WMG does not do water management related activities, jointly with government & non-government organizations and LGIs.	WMG has initiated discussion on joint water management related activities with government & non-government organizations and LGIs.	The WMG sometimes implements water management related activities jointly with government & non-government organizations and LGIs.	The WMG engages in water management related activities jointly with government & non-government organizations and LGIs.		
3.4	There is no conflict relating to use of water and water management in the WMG area.	There is conflict in the WMG area over the use of water and water management.	There is/are minor conflict(s) relating to use of water and water management in the WMG area but no initiative has been taken yet to resolve it/them.	There is/are minor conflict(s) relating to use of water and water management in the WMG area but initiative has been taken to resolve it/them.	There is no conflict relating to use of water and water management in the WMG area, or conflicts have all been resolved.
