From Blue Gold Program Wiki

Blue Gold Programme

Planning, design and monitoring of community based water management systems in Polder 30

Acknowledgement

This publication was made possible with a financial contribution of the Netherlands Government. We would like to express our gratefulness to Bangladesh Water Development Board (BWDB) in support us in providing guideline at different stages of implementing this project. We also acknowledge the contribution of Blue Gold TA team in designing and implementation of this project in a more integrated way with Water Management Groups (WMGs). We would also like to express gratitude to Mr. Mofassal Ahmed, Water Resource Management (WRM) leader and all WRM team for their scholastic guidance. Heartfelt gratitude is expressed to farmers and WMG members, who helped to make the project successful. We are also thankful to anonymous reviewers for their constructive criticism and advice to improve the report.

Final Design Report
January 2014

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the

aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
