Final Technical Report
Piloting floating cage aquageoponics system in polders: an innovation to increase fish and vegetable production in polder based farming system

Contents	
acknowledgements	4
Executive summary	5
1. Background	6
2. Methods and Approach	6
2.1 Applying a business development lens	6
2.2 Project location	10
2.3 Site selection process in brief	11
2.4 Business grouping	12
2.5 Cage construction	12
2.6 Fish handling	12
2.7 Vegetable planting	12
2.8 Feeding fish	12
2.9 Water quality monitoring	12
2.10 Water quality monitoring and harvesting of fish and vegetables	12
3. Results and Discussion	13
3.1 Business aspects	13
3.1.1 Value proposition: Why aquageoponics?	13
3.1.2 Key business activities	14
3.1.3 Customer segments	14
3.1.4 Customer relationship channels	15
3.1.5 Cost structure, revenue and unit benefits of the business	16
3.2 Technical Aspects	21
3.2.1 Lessons on water body selection	21
3.2.2 Working with groups and individuals	22
3.2.3 Cage construction objectives	22
3.2.4 Adapting working density and choice of fish	22
3.2.5 Vegetable production results	23
3.2.6 Feed Conversion Ratio	23
3.2.7 Water quality results	24
4. Challenges, risk and risk mitigation efforts	25
4.1 What is needed to further develop it?	26

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
