# Blue Gold Program Water Management and Productive Sectors Innovation Funds

## Quarterly Progress Report: April – June 2017

### Innovation Fund: Scope and Purpose

The Blue Gold Innovation Fund is a tool created to accelerate the development process in the program area of the Blue Gold program, by financing innovative approaches and new initiatives to socio-economic development. Innovations submitted to the Blue Gold Innovation Fund are expected to contribute to the outcome / results of the Blue Gold program; the expected impact expected to be mostly locally or regionally centred.

In March 2017, as a result of revision to the overall TA budget, the Innovation Fund was restructured by EKN as follows:

1. Water Management Fund with a budget of € 1.4 million (focusing on water resources management)
2. Productive Sectors Fund with a budget of € 1.05 million (focusing on agricultural production and food security).

In addition, a fund of approximately € 1.4 million was transferred to the direct administration of the Embassy of the Kingdom of the Netherlands (EKN), under the joint management of Deltares/ Institute of Water Modelling: Water Management Knowledge and Innovation Program (WMKIP).

The Innovation Fund is setup to utilize the establishment of linkages between Blue Gold and Bangladesh and Netherlands-based businesses / organisations. Contributions to innovation within Blue Gold may emerge from a wide variety of knowledge centres and enterprises, as long as the proposed activities fit within the framework of either the Water Management Fund or the Productive Sectors Fund. The Blue Gold Program will scan relevant institutions and enterprises for emerging opportunities in specific technical fields.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
