Water Management and Productive Sectors Innovation Fund

Report of Quarter 1 – 2015

1. Development and introduction of a web-based GIS information Platform

Between the months of January and March 2015 the Blue Gold team has focused on updating the data of the web-based GIS information platform for all 12 polders of the program. As part of this activity the Blue Gold team purchased a GIS dataset from the Water Resource Planning Organization (WARPO), which is currently being analyzed on its usefulness for the GIS portal. Additionally the data gathered by Blue Gold itself is added to the portal (i.e. WMGs, roads, kahls and structures).

It is expected that this work will be completed by the end of May 2015, after which the third and final N&S expert mission will take place (planned for June 2015).

2. Women-managed Small Household Ponds (SHHP)

On March 2nd 2015, WorldFish submitted a request to extend the contract of the SHHP project, citing that the project was started up later than originally planned which lead to unspent funds. It was agreed by Blue Gold to extend the original end date of the SHHP project of March 9th 2015 to 30th June with no additional costs. A final report on the SHHP project is expected by 30th June 2015.

3. Pilot with IWM on Polder Community Water Management (CoWM) in polder 30.

On March 2nd 2015, Martina Groenemeijer finished her four months internship at the community water management pilot in Polder 30 in Khulna District by presenting her findings to the Blue Gold team in the Dhaka office. Martina's main tasks were to carry out a baseline survey, to monitor progress of the pilot and to advise on up-scaling options.

In December 2014 IRRI informed that their proposal for additional funding (US\$ 750,000) under the CGIAR Research Program on Water, Land, and Ecosystems (WLE) has been successful. Blue Gold is supporting this initiative, which includes IRRI, WorldFish, IWM, IWM and a number of NGO's. The inception workshop for the IRRI research initiative took place in February 2015. The start of the integrated field visit is planned for April 2015.

6. New initiative
6.1. Development of a web-based GIS information Platform
The Joint Water Authorities (JWA) and Water Resource Planning Organization (WARPO) entered the Blue Gold program between 20 - 28 January 2015. The focus of the initiative was to explore possibilities for mutual cooperation with the Blue Gold program.
JWA and WARPO have their working methods and current work as comparable to the activities undertaken in the Blue Gold program, and provided three possible areas of cooperation:
• Develop and initiate creating the Bangladesh Water Development Board staff on life cycle saving, creating sustainable awareness in design, implementation and operation of assets.
• The introduction of a pilot-scale water supply in the development of the water supply system of WARPO.
• In March 2015 JWA will assist in the development of a pilot-scale water supply through Participatory Irrigation Planning and Management (PIPM) in the development of the water supply system.
• A young faculty member will be placed in Bangladesh to cooperate with the Blue Gold program and to assist in observation activities.
• Further cooperation activities will be initiated after establishment of a youth working network.
It is expected that this work will be completed by the end of May 2015, after which the third and final N&S expert mission will take place (planned for June 2015).
6.2. Development of a web-based GIS information Platform
The development of the Blue Gold GIS has resulted in collaboration with Blue Gold around the placement of a license from the Netherlands within the Blue Gold program, as part of the Netherlands Future Young Expert Program (FYEP) Water program.
The license is an extension of the Blue Gold GIS to the participation of the license in the FYEP program. As part of the FYEP program, the license will be placed in Dhaka. The license will be active within Component 2 of the Blue Gold program.
The responsibilities of the license holder being with the Blue Gold Innovation Fund Manager to jointly develop and implement the license holder's activities in the field of water resource planning, climate change mitigation, coastal zone management (water logging) and design of water management structures (dikes, levees, embankments, etc.) for the coastal zone in southern Bangladesh.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
