Training of Trainers for Farmer Trainer

Blue Gold has started the development of Farmer Trainers in 10 new polders, who will be able to take over the role of CDFs in organizing Farmer Field Schools. Recently Blue Gold has selected 76 Farmer Trainers (FTs) from Khulna and Patuakhali from different polders, among them 41 men and 35 women. Some of the selected FTs have already experienced to work with different development projects.

A three-week Training of Trainers course (FT-TOT) was organized to increase their knowledge and skills on Fisheries-Livestock-Nutrition modules and to familiarize them with FFS principles and activities that will be used during the 9th cycle of FFSs, which will be starting at April 2017. A lot of attention was given to developing their facilitation skills. The major contents of Fisheries modules are on semi-intensive fish culture, focusing on pond preparation, post stocking management, feed and disease management etc. The beef fattening module focused on cattle selection, housing management, feed management, disease management de-worming etc. The nutrition modules focused on food classification, 1000 days approach, proper cooking steps etc. Market orientation, networking, market actors, collective actions were addressed in a number of value chain sessions. The 76 FT candidates were trained in three courses, each of 18-day duration, at Khulna and Patuakhali from January – March 2017. The venues were CODEC Center Patuakhali and CSS Ava Center Khulna.

From April 2017 to March 2018 the new FTs will be apprentice in FFSs organized by FOs. After March 2018 these FTs will then be ready to run their own FFSs.

Objectives of the TOT:

- To familiarize FTs with Blue Gold activities

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
