Green corner – Save a tree today!

Mott MacDonald is committed to integrating sustainability into our operational practices and culture. As a world leading infrastructure business we are always looking to improve our own performance and reduce the environmental impact of our business. Sustainably means that we are committed to being sustainable in the personal lives – as an employee career company Mott MacDonald shares that responsibility. We have an ethical obligation to reduce our emissions and resource use and have committed to reducing our per capita carbon footprint by a minimum of 10% over our life cycle.

We print our reports and other submissions using recycled, chlorine free paper. Companies to printing single sided on A4 paper, double sided printing on recycled paper, reduce the consumption of their resources, such as ink or toner and a better choice of paper grade for every 100 sheets. By choosing the greener path we have been able to achieve effectiveness throughout both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Green Paper' initiative:

- Print on standard facing when possible
- Use one sided paper when possible
- Recycling paper in the office creates a better working environment for our staff and our clients.

We believe that you, as one of our valued clients, will share our concern to conserve precious resources for the benefit of our planet and the stakeholders.

Approved Mott MacDonald & Associates

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
