### Brief of Rabi Planning Workshop

CRIMM Rabi Planning Workshop has been organized on 22<sup>nd</sup> at Patuakhali and 29<sup>th</sup> at Khulna. The participants were the 24 Farmers & 19MS of the respective CRIMM Rabi, experienced farmers from other CRIMM Rabi, WDA Members, SDA and CRIMM officers. The plan is based on the national, Khulna & one Subarea 2 in different Rabi. CRIMM subcommittee members were selected under Khulna, Patuakhali and Havelok. The objectives of the planning workshop were to review the selected CRIMM Rabi under management, position, existing and present situation of the Rabi, prospects and plan for Rabi plan according to the situation.

They also reviewed and discussed the needs, preferences, other CRIMM experience and challenges of CRIMM/CRIMM members for Rabi season cultivation and select crops considering marketing challenges (related to inputs, outputs, market linkage) for the selected crops to identify possible solutions for the optimum benefit. At the end of the workshop a comprehensive plan for Rabi crops 2019 has been prepared and presented by the CRIMM farmers along with SDA/MS, SDA and Extension Officers.

It is noted that one CRIMM farmers were cultivated 80 T in demo plots (80 seed under Rabi) which they established an example & big hope among the farmers. The SDA, SDA and Scientific Officer severely wished that plot as a high potential crop and already MSO offered the farmers to purchase that crop 80T USD/round as a seed for the next year.

From the overall observation on the day long workshop is "Developed a strong relationship among the WDA and SDA, which is the result of collaborative work among the WDA, SDA, Union Parishad." The WDA & SDA are already selected the CRIMM members and highly committed to continuous demand to expand the CRIMM in other areas as their next activities.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
