Template:Cite book/TemplateData

From Blue Gold Program Wiki

< [Template:Cite book](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This is the [TemplateData](#) for this template used by [TemplateWizard](#), [VisualEditor](#) and other tools. [Click here](#) to see a monthly parameter usage report for this template based on this TemplateData.

TemplateData for Cite book

This template formats a citation to a book using the provided bibliographic information (such as author and title) as well as various formatting options.

Template parameters

This template prefers inline formatting of parameters.

	Parameter	Description	Type	Status
Last name	last last1 author author1 author1-last author-last surname1 author-last1 subject1 surname author-last subject	The surname of the author; don't wikilink, use 'authorlink'; can suffix with a numeral to add additional authors	String	suggested
First name	first given author-first first1 given1 author-first1 author1-first	Given or first name, middle names, or initials of the author; don't wikilink, use 'authorlink'; can suffix with a numeral to add additional authors	String	suggested
URL	url URL	The URL of the online location where the text of the publication can be found. Requires schemes of the type "http://..." or maybe even the protocol relative scheme "//..." Example https://books.google.com/books?id=...	String	optional
Title	title	The title of the book; displays in italics	String	required
Title link	title-link titlelink episode-link episodelink	Title of existing Wikipedia article about the source named in title - do not use a web address; do not wikilink.	Page	optional
Vancouver style author list	vauthors	If using Vancouver style, comma separated list of author names; enclose corporate or institutional author names in doubled parentheses Example Smythe JB, ((Megabux Corporation))	String	optional
Last name 2	last2 author2 surname2 author-last2 author2-last subject2	The surname of the second author; don't wikilink, use 'authorlink2'; can suffix with a numeral to add additional authors	String	optional
First name 2	first2 given2 author-first2 author2-first	Given or first name, middle names, or initials of the second author; don't wikilink, use 'authorlink2'; can suffix with a numeral to add additional authors	String	optional

	Parameter	Description	Type	Status
Last name 3	last3 author3	The surname of the third author; don't wikilink, use 'authorlink3'.	String	optional
	surname3 author-last3 author3-last subject3			
First name 3	first3 given3	Given or first name, middle names, or initials of the third author; don't wikilink.	String	optional
	author-first3 author3-first			
Last name 4	last4 author4	The surname of the fourth author; don't wikilink, use 'authorlink4'.	String	optional
	surname4 author-last4 author4-last subject4			
First name 4	first4 given4	Given or first name, middle names, or initials of the fourth author; don't wikilink.	String	optional
	author-first4 author4-first			
Last name 5	last5 author5	The surname of the fifth author; don't wikilink, use 'authorlink5'.	String	optional
	surname5 author-last5 author5-last subject5			
First name 5	first5 given5	Given or first name, middle names, or initials of the fifth author; don't wikilink.	String	optional
	author-first5 author5-first			
Last name 6	last6 author6	The surname of the sixth author; don't wikilink, use 'authorlink6'.	String	optional
	surname6 author-last6 author6-last subject6			
First name 6	first6 given6	Given or first name, middle names, or initials of the sixth author; don't wikilink.	String	optional
	author-first6 author6-first			
Last name 7	last7 author7	The surname of the seventh author; don't wikilink, use 'authorlink7'.	String	optional
	surname7 author-last7 author7-last subject7			
First name 7	first7 given7	Given or first name, middle names, or initials of the seventh author; don't wikilink.	String	optional
	author-first7 author7-first			
Last name 8	last8 author8	The surname of the eighth author; don't wikilink, use 'authorlink8'.	String	optional
	surname8 author-last8 author8-last subject8			
First name 8	first8 given8	Given or first name, middle names, or initials of the eighth author; don't wikilink.	String	optional
	author-first8 author8-first			
Last name 9	last9 author9	The surname of the ninth author; don't wikilink, use 'authorlink9'. If nine authors are defined, then only eight will show and 'et al.' will show in place of the last author.	String	optional
	surname9 author-last9 author9-last subject9			
First name 9	first9 given9	Given or first name, middle names, or initials of the ninth author; don't wikilink.	String	optional
	author-first9 author9-first			

	Parameter	Description	Type	Status
Collaboration	collaboration	Name of a group of authors or collaborators; requires author, last, or vauthors which list one or more primary authors; follows author name-list; appends 'et al.' to author name-list.	String	optional
	Date date air-date airdate	Full date of the source; do not wikilink	Date	optional
Work	work journal website newspaper magazine encyclopedia encyclopaedia dictionary mailinglist	Name of the work in which the cited book text is found	String	optional
	Publisher publisher distributor institution newsgroup	Name of the publisher; displays after title	String	suggested
Others	others	Used to record other contributions to the work, such as 'Illustrated by John Smith' or 'Translated by John Smith'	String	optional
Year of publication	year	Year of the source being referenced; use 'date' instead, if month and day are also known	String	suggested
ISBN	isbn ISBN13 isbn13 ISBN	International Standard Book Number; use the 13-digit ISBN where possible	String	suggested
Ignore ISBN Error	ignore-isbn-error	True if ISBN Errors should be ignored.If set, page will be added to a maintenance category "CS1 maint: Ignored ISBN errors".	Boolean	optional
Editor last name	editor-last editor editor-surname editor-last1 editor-surname1 editor1 editor1- last editor1- surname	The surname of the editor; don't wikilink, use 'editor-link'; can suffix with a numeral to add additional editors	Unknown	optional
Editor first name	editor-first editor-given editor-first1 editor-given1 editor1-first editor1-given	Given or first name, middle names, or initials of the editor; don't wikilink, use 'editor-link'; can suffix with a numeral to add additional editors	Unknown	optional
Link for editor	editor-link editorlink editor- link1 editor1-link editorlink1 editor1link	Title of existing Wikipedia article about the editor	Page	optional

	Parameter	Description	Type	Status
Editor mask	editor-mask editormask editormask1 editor1-mask editor-mask1 editor1mask	Replaces the name of the first editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
Vancouver style editor list	veditors	Comma separated list of editor names in Vancouver style; enclose corporate or institutional names in doubled parentheses Example Smythe JB, ((Megabux Corporation))	String	optional
Editors list	editors	Free-form list of editor names; use of this parameter is discouraged	Unknown	deprecated
Edition	edition	When the publication has more than one edition; for example: '2nd', 'Revised' etc.; suffixed by ' ed.'	String	optional
Series identifier	series version	Series identifier when the source is part of a series, such as a book series or a journal	String	optional
Volume	volume	For one publication published in several volumes	String	optional
Location of publication	location place	Geographical place of publication; usually not wikilinked; omit when the publication name includes place	String	suggested
Place of publication	publication-place publicationplace	Publication place shows after title; if 'place' or 'location' are also given, they are displayed before the title prefixed with 'written at'	String	optional
Publication date	publication-date publicationdate	Date of publication when different from the date the work was written; do not wikilink	String	optional
Page	page p	The number of a single page in the source that supports the content; displays after 'p.'; use either page= or pages=, but not both	String	optional
Page(s) cited	pages pp	A range of pages in the source that support the content (not an indication of the number of pages in the source); displays after 'pp.'; use either page= or pages=, but not both	String	suggested
No pp	nopp	Set to 'y' to suppress the 'p.' or 'pp.' display with 'page' or 'pages' when inappropriate (such as 'Front cover')	String	optional
At	at	May be used instead of 'page' or 'pages' where a page number is inappropriate or insufficient	String	optional
Language	language in	The language in which the source is written, if not English; use the full language name; do not use icons or templates	String	optional

	Parameter	Description	Type	Status
Translator last name	translator-last translator translator-last1 translator1 translator1-last	The surname of the translator; don't wikilink, use 'translator-link'; can suffix with a numeral to add additional translators.	String	optional
Translator first name	translator-first translator1-first translator-first1	Given or first name, middle names, or initials of the translator; don't wikilink, use 'translator-link'; can suffix with a numeral to add additional translators.	String	optional
Script title	script-title	For titles in languages that do not use a Latin-based alphabet (Arabic, Bengali, Chinese, Cyrillic, Greek, Hebrew, Japanese, Korean, Vietnamese, etc). Prefix with two-character ISO639-1 language code followed by a colon. For Japanese use: script-title=ja:...	String	optional
Translated title	trans-title trans_title	An English language title, if the source cited is in a foreign language; 'language' is recommended	String	optional
Chapter	chapter contribution entry article section	The chapter heading of the source; may be wikilinked or with 'chapterurl' but not both. For the contribution alias, see contributor-last	String	optional
Script Chapter	script-chapter	Chapter heading for languages that do not use a Latin-based alphabet (Arabic, Chinese, Cyrillic, Greek, Hebrew, Japanese, Korean, Vietnamese, etc); follows transliteration defined in chapter. Should be prefixed with an ISO 639-1 two-character code to help browsers properly display the script Example ja:□□□□	String	optional
Translated chapter	trans-chapter trans_chapter	An English language chapter heading, if the source cited is in a foreign language; 'language' is recommended	String	optional
Type	type medium	Additional information about the media type of the source; format in sentence case	String	optional
Format	format	Format of the work referred to by 'url'; examples: PDF, DOC, XLS; do not specify HTML	String	optional
arXiv identifier	arxiv ARXIV eprint	An identifier for arXive electronic preprints of scientific papers	String	optional
arXiv Class	class	Cite arXiv identifiers	String	optional
ASIN	asin ASIN	Amazon Standard Identification Number; 10 characters	String	optional

	Parameter	Description	Type	Status
ASIN TLD	asin-tld	ASIN top-level domain for Amazon sites other than the US	String	optional
Bibcode	bibcode	Bibliographic Reference Code (REFCODE); 19 characters	String	optional
biorXiv	biorxiv	biorXiv identifier; 6 digits	Line	optional
CiteSeerX	citeseerx	CiteSeerX identifier; found after the 'doi=' query parameter	Line	optional
DOI	doi DOI	Digital Object Identifier; begins with '10.'	String	optional
EISSN	eissn EISSN	International Standard Serial Number for the electronic media of a serial publication; eight characters may be split into two groups of four using a hyphen, but not an en dash or a space. Example 2009-0048	String	optional
Handle System identifier	hdl HDL	Handle System identifier for digital objects and other resources on the Internet	String	optional
ISMN	ismn ISMN	International Standard Music Number; Use the ISMN actually printed on or in the work. Hyphens or spaces in the ISMN are optional. Example 979-0-9016791-7-7	String	optional
ISSN	issn ISSN	International Standard Serial Number; 8 characters; may be split into two groups of four using a hyphen	String	optional
jfm code	j fm	Jahrbuch über die Fortschritte der Mathematik classification code	String	optional
JSTOR	jstor JSTOR	JSTOR identifier	String	optional
LCCN	lccn LCCN	Library of Congress Control Number	String	optional
MR	mr MR	Mathematical Reviews identifier	String	optional
OCLC	oclc OCLC	Online Computer Library Center number	String	optional
OL	ol OL	Open Library identifier; do not include "OL" at beginning of identifier	String	optional
OSTI	osti OSTI	Office of Scientific and Technical Information identifier	String	optional
PMC	pmc	PubMed Center article number	String	optional
PMID	pmid PMID	PubMed Unique Identifier	String	optional
RFC	rfc	Request for Comments number	String	optional
SSRN	ssrn	Social Science Research Network	String	optional
Zbl	zbl	Zentralblatt MATH journal identifier	String	optional
id	id ID	A unique identifier used where none of the specialized ones are applicable	String	optional

	Parameter	Description	Type	Status
Quote	quote quotation	Relevant text quoted from the source; displays last, enclosed in quotes; needs to include terminating punctuation	String	optional
Ref	ref	An anchor identifier; can be made the target of wikilinks to full references; special value 'harv' generates an anchor suitable for the harv and sfn templates	String	optional
Name list format	name-list-format	Accepts the single keyword 'vanc' to emulate Vancouver Style author / editor name-lists.	String	optional
Mode	mode	Sets separator and terminal punctuation to the style named in the assigned value; allowable values are: 'cs1' or 'cs2'	String	optional
Postscript	postscript	The closing punctuation for the citation; ignored if 'quote' is defined; to suppress use reserved keyword 'none' Default .	String	optional
Registration	registration	For online sources that require registration, set to 'yes' (or 'y', or 'true'); superseded by subscription if both are set	String	optional
Subscription	subscription	For online sources that require subscription, set to 'yes' (or 'y', or 'true'); supersedes registration if both are set	String	optional
Author mask	author-mask authormask authormask1 author1-mask author-mask1 author1mask	Replaces the name of the first author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
Author mask 2	author-mask2 authormask2 author2-mask author2mask	Replaces the name of the second author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
Author mask 3	author-mask3 authormask3 author3-mask author3mask	Replaces the name of the third author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional

	Parameter	Description	Type	Status
Author mask 4	author-mask4	Replaces the name of the fourth author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask4			
	author4-mask			
	author4mask			
Author mask 5	author-mask5	Replaces the name of the fifth author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask5			
	author5-mask			
	author5mask			
Author mask 6	author-mask6	Replaces the name of the sixth author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask6			
	author6-mask			
	author6mask			
Author mask 7	author-mask7	Replaces the name of the seventh author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask7			
	author7-mask			
	author7mask			
Author mask 8	author-mask8	Replaces the name of the eighth author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask8			
	author8-mask			
	author8mask			
Author mask 9	author-mask9	Replaces the name of the ninth author with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing author separator; for example, 'with' instead	String	optional
	authormask9			
	author9-mask			
	author9mask			
Display authors	display-authors displayauthors	number of authors to display before 'et al.' is used	Number	optional

	Parameter	Description	Type	Status
Author link	author-link	Title of existing Wikipedia article about the author; can suffix with a numeral to add additional authors	Page	optional
	authorlink			
	subjectlink			
	subject-link			
	authorlink1			
	author1-link			
	subjectlink1			
	author1link			
	subject-link1			
Author link 2	subject1-link	Title of existing Wikipedia article about the second author; can suffix with a numeral to add additional authors	Page	optional
	subject1link			
	author-link2			
	authorlink2			
	author2-link			
	subjectlink2			
	author2link			
	subject-link2			
	subject2-link			
Author link 3	subject2link	Title of existing Wikipedia article about the third author.	Page	optional
	author-link3			
	authorlink3			
	author3-link			
	subjectlink3			
	author3link			
	subject-link3			
	subject3-link			
	subject3link			
Author link 4	author-link4	Title of existing Wikipedia article about the fourth author.	Page	optional
	authorlink4			
	author4-link			
	subjectlink4			
	author4link			
	subject-link4			
	subject4-link			
	subject4link			
	author-link5	Title of existing Wikipedia article about the fifth author.	Page	optional
Author link 5	authorlink5			
	author5-link			
	subjectlink5			
	author5link			
	subject-link5			
	subject5-link			
	subject5link			
	author-link6	Title of existing Wikipedia article about the sixth author.	Page	optional
Author link 6	authorlink6			
	author6-link			
	subjectlink6			
	author6link			
	subject-link6			
	subject6-link			
	subject6link			

	Parameter	Description	Type	Status
Author link 7	author-link7	Title of existing Wikipedia article about the seventh author.	Page	optional
	authorlink7			
	author7-link			
	subjectlink7			
	author7link			
	subject-link7			
	subject7-link			
Author link 8	subject7link	Title of existing Wikipedia article about the eighth author.	Page	optional
	author-link8			
	authorlink8			
	author8-link			
	subjectlink8			
	author8link			
	subject-link8			
Author link 9	subject8-link	Title of existing Wikipedia article about the ninth author.	Page	optional
	subject8link			
	author-link9			
	authorlink9			
	author9-link			
	subjectlink9			
	author9link			
URL access date	subject-link9	The full date when the original URL was accessed; do not wikilink	String	optional
	subject9-link			
Original year	subject9link	Original year of publication; provide specifics	String	optional
	access-date			
Last name of second editor	accessdate	The surname of the second editor; don't wikilink, use 'editor2-link'	String	optional
	orig-year			
	origyear			
	editor-last2			
First name of second editor	editor-surname2	Given or first name, middle names, or initials of the second editor; don't wikilink, use 'editor2-link'	String	optional
	editor2			
	editor2-last			
	editor2-surname			
Link for second editor	editor-first2	Title of existing Wikipedia article about the second editor	Page	optional
	editor-given2			
	editor2-first			
	editor2-given			
Mask for second editor	editor-link2	Replaces the name of the second editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
	editor2-link			
	editorlink2			
	editor2link			
Last name of third editor	editor-mask2	The surname of the third editor; don't wikilink, use 'editor3-link'	String	optional
	editormask2			
	editor2-mask			
	editor2mask			
	editor-last3			
	editor-surname3			
	editor3			
	editor3-last			
	editor3-surname			

	Parameter	Description	Type	Status
First name of third editor	editor-first3	Given or first name, middle names, or initials of the third editor; don't wikilink, use 'editor3-link'	String	optional
	editor-given3			
	editor3-first			
	editor3-given			
Link for third editor	editor-link3	Title of existing Wikipedia article about the third editor	Page	optional
	editor3-link			
	editorlink3			
	editor3link			
Mask for third editor		Replaces the name of the third editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
	editor-mask3			
	editormask3			
	editor3-mask			
Last name of fourth editor	editor-mask			
	editor3mask			
	editor3mask			
	editor3mask			
Last name of fourth editor	editor-last4	The surname of the fourth editor; don't wikilink, use 'editor4-link'	String	optional
	editor-surname4			
	editor4 editor4-			
	last editor4-surname			
First name of fourth editor	editor-first4	Given or first name, middle names, or initials of the fourth editor; don't wikilink, use 'editor4-link'	String	optional
	editor-given4			
	editor4-first			
	editor4-given			
Link for fourth editor	editor-link4	Title of existing Wikipedia article about the fourth editor	Page	optional
	editor4-link			
	editorlink4			
	editor4link			
Mask for fourth editor		Replaces the name of the fourth editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
	editor-mask4			
	editormask4			
	editor4-mask			
Mask for fourth editor	editor-mask4			
	editormask4			
	editor4-mask			
	editor4mask			
Last name of fifth editor	editor-mask4			
	editor3mask			
	editor3mask			
	editor3mask			
Last name of fifth editor	editor-last5	The surname of the fifth editor; don't wikilink, use 'editor5-link'	String	optional
	editor-surname5			
	editor5 editor5-			
	last editor5-surname			
First name of fifth editor	editor-first5	Given or first name, middle names, or initials of the fifth editor; don't wikilink, use 'editor5-link'	String	optional
	editor-given5			
	editor5-first			
	editor5-given			
Link for fifth editor	editor-link5	Title of existing Wikipedia article about the fifth editor	Page	optional
	editor5-link			
	editorlink5			
	editor5link			

	Parameter	Description	Type	Status
Mask for fifth editor	editor-mask5 editormask5 editor5-mask editor5mask	Replaces the name of the fifth editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
Last name of sixth editor	editor-last6 editor-surname6 editor6 editor6- last editor6- surname	The surname of the sixth editor; don't wikilink, use 'editor6-link'	String	optional
First name of sixth editor	editor-first6 editor-given6 editor6-first editor6-given	Given or first name, middle names, or initials of the sixth editor; don't wikilink, use 'editor6-link'	String	optional
Link for sixth editor	editor-link6 editor6-link editorlink6 editor6link	Title of existing Wikipedia article about the sixth editor	Page	optional
Mask for sixth editor	editor-mask6 editormask6 editor6-mask editor6mask	Replaces the name of the sixth editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
Last name of seventh editor	editor-last7 editor-surname7 editor7 editor7- last editor7- surname	The surname of the seventh editor; don't wikilink, use 'editor7-link'	String	optional
First name of seventh editor	editor-first7 editor-given7 editor7-first editor7-given	Given or first name, middle names, or initials of the seventh editor; don't wikilink, use 'editor7-link'	String	optional
Link for seventh editor	editor-link7 editor7-link editorlink7 editor7link	Title of existing Wikipedia article about the seventh editor	Page	optional
Mask for seventh editor	editor-mask7 editormask7 editor7-mask editor7mask	Replaces the name of the seventh editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
Last name of eighth editor	editor-last8 editor-surname8 editor8 editor8- last editor8- surname	The surname of the eighth editor; don't wikilink, use 'editor8-link'	String	optional

	Parameter	Description	Type	Status
First name of eighth editor	editor-first8	Given or first name, middle names, or initials of the eighth editor; don't wikilink, use 'editor8-link'	String	optional
	editor-given8			
	editor8-first			
	editor8-given			
Link for eighth editor	editor-link8	Title of existing Wikipedia article about the eighth editor	Page	optional
	editor8-link			
	editorlink8			
	editor8link			
Mask for eighth editor	editor-mask8	Replaces the name of the eighth editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
	editormask8			
	editor8-mask			
	editor8mask			
Last name of ninth editor	editor-last9	The surname of the ninth editor; don't wikilink, use 'editor9-link'	String	optional
	editor-surname9			
	editor9-editor9-last			
	editor9-surname			
First name of ninth editor	editor-first9	Given or first name, middle names, or initials of the ninth editor; don't wikilink, use 'editor9-link'	String	optional
	editor-given9			
	editor9-first			
	editor9-given			
Link for ninth editor	editor-link9	Title of existing Wikipedia article about the ninth editor	Page	optional
	editor9-link			
	editorlink9			
	editor9link			
Mask for ninth editor	editor-mask9	Replaces the name of the ninth editor with em dashes or text; set to a numeric value 'n' to set the dash 'n' em spaces wide; set to a text value to display the text without a trailing editor separator; for example, 'with' instead	String	optional
	editormask9			
	editor9-mask			
	editor9mask			
Display Editors	display-editors displayeditors	Controls the number of editor names that are displayed when a citation is published. To change the displayed number of editors, set display-editors to the desired number. For example, display-editors=2 will display only the first two editors in a citation. By default, all editors are displayed. display-editors=etal displays all editors in the list followed by et al.	String	optional
Translator last name 2	translator-last2	The surname of the second translator; don't wikilink, use 'translator-link'.	String	optional
	translator2			
	translator2-last			
Translator first name 2	translator-first2	Given or first name, middle names, or initials of the second translator; don't wikilink, use 'translator-link'.	String	optional
	translator2-first			

	Parameter	Description	Type	Status
Translator last name 3	translator-last3 translator3 translator3-last	The surname of the third translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 3	translator-first3 translator3-first	Given or first name, middle names, or initials of the third translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 4	translator-last4 translator4 translator4-last	The surname of the fourth translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 4	translator-first4 translator4-first	Given or first name, middle names, or initials of the fourth translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 5	translator-last5 translator5 translator5-last	The surname of the fifth translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 5	translator-first5 translator5-first	Given or first name, middle names, or initials of the fifth translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 6	translator-last6 translator6 translator6-last	The surname of the sixth translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 6	translator-first6 translator6-first	Given or first name, middle names, or initials of the sixth translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 7	translator-last7 translator7 translator7-last	The surname of the seventh translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 7	translator-first7 translator7-first	Given or first name, middle names, or initials of the seventh translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 8	translator-last8 translator8 translator8-last	The surname of the eighth translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 8	translator-first8 translator8-first	Given or first name, middle names, or initials of the eighth translator; don't wikilink, use 'translator-link'.	String	optional
Translator last name 9	translator-last9 translator9 translator9-last	The surname of the ninth translator; don't wikilink, use 'translator-link'.	String	optional
Translator first name 9	translator-first9 translator9-first	Given or first name, middle names, or initials of the ninth translator; don't wikilink, use 'translator-link'.	String	optional
Translator link	translator-link translator-link1 translator1-link	Title of existing Wikipedia article about the translator; can suffix with a numeral to add additional translators.	Page	optional
Translator link 2	translator-link2 translator2-link	Title of existing Wikipedia article about the second translator.	Page	optional
Translator link 3	translator-link3 translator3-link	Title of existing Wikipedia article about the third translator.	Page	optional
Translator link 4	translator-link4 translator4-link	Title of existing Wikipedia article about the fourth translator.	Page	optional

	Parameter	Description	Type	Status
Translator link 5	translator-link5 translator5-link	Title of existing Wikipedia article about the fifth translator.	Page	optional
Translator link 6	translator-link6 translator6-link	Title of existing Wikipedia article about the sixth translator.	Page	optional
Translator link 7	translator-link7 translator7-link	Title of existing Wikipedia article about the seventh translator.	Page	optional
Translator link 8	translator-link8 translator8-link	Title of existing Wikipedia article about the eighth translator.	Page	optional
Translator link 9	translator-link9 translator9-link	Title of existing Wikipedia article about the ninth translator.	Page	optional
Chapter URL	chapter-url chapterurl contribution-url section-url contributionurl sectionurl	The URL of the online location where the text of the chapter can be found	String	optional
Format of Chapter URL	chapter-format contribution-format section-format	Format of the work referred to by chapter-url; displayed in parentheses after chapter. HTML is implied and should not be specified. Example PDF, DOC, or XLS	String	optional
DOI broken date	doi-broken-date doi_brokendate	The date that the DOI was determined to be broken	String	optional
URL access level	url-access	Classification of the access restrictions on the URL ('registration', 'subscription' or 'limited')	String	optional
Archive URL	archive-url archiveurl	The URL of an archived copy of a web page, if or in case the URL becomes unavailable; requires 'archivedate'	String	optional
Archive Format	archive-format	Format of the Archive	String	optional
Archive date	archive-date archivedate	Date when the original URL was archived; do not wikilink	String	optional
URL status	url-status	If set to 'live', the title display is adjusted; useful for when the URL is archived preemptively but still live. Set to "dead" or 'usurped' for broken links. Entering 'unfit' or 'usurped' makes the original link not appear at all. Default dead Example 'dead' or 'live'	String	optional
Lay URL	lay-url lay-summary laysummary layurl	URL link to a non-technical summary or review of the source	String	optional
Lay source	lay-source laysource	Name of the source of the laysummary; displays in italics, preceded by an en dash	String	optional

	Parameter	Description	Type	Status
Lay date	lay-date laydate	Date of the summary; displays in parentheses	String	optional
Last author ampersand	last-author-amp lastauthoramp	When set to any value, changes the separator between the last two names of the author list to 'space ampersand space'	String	optional
Via	via	Aggregate or database provider, when different from the Publisher. Typically used for Ebooks. Example Open Edition, JSTOR	String	optional

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
