Acknowledgment

This publication was made possible with a financial contribution of the Netherlands Government. We would like to express our gratitude to the Bangladesh Water Development Board (BWDB) for support in providing guidelines in different stages of implementing this study. We also acknowledge the contribution of Blue Gold 13 team in designing and implementation of this project in a more integrated way with Water Management Strategy (WMS). We would also like to express our gratitude to Mr. Mohamed Elmaghrabi, Water Resource Management (WRM) leader and all WRM team for their valuable guidance. Deltares' gratitude is expressed to farmers and all community members, who helped to make the project successful. We are also thankful to anonymous reviewers for their constructive criticism and advice to improve the report.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
