## FINAL REPORT

31 January 2019

### Acknowledgments

The authors wish to acknowledge the support of Bangladesh Agricultural University (BAU) for providing the financial support of the 'Innovision Agro Service Ltd. (IASL) through the support of the Blue Gold Program under Bangladesh Water Development Board (BWDB). We are grateful to the Blue Gold Team, Innovation Unit of IASL and Bangladesh for the support in implementation of the project work. We also acknowledge the members of Blue Gold Project household (i.e. farmer group in Patuakhali region) for their valuable inputs.

### Disclaimer

This is the view and opinion of the author (Innovision Agro Service Ltd.), and it does not necessarily represent the view of the Bangladesh Government or IASL or the Blue Gold program.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
