Blue Gold Program
362-Sher-E-Bangla Road, Khulna-9100

**Report of workshop to find out constraints/opportunities and possible interventions
of output market actors and producers in vegetables value chain**

Introduction:

Vegetables are one of the most important subsectors in Bangladesh. The subsector plays a vital role in rural economy. Most farmers in polder areas (WMG member) cultivate winter, summer vegetables round the year either in dike or homestead to meet up own consumption and commercial basis also. Farmers are cultivating different types of vegetables taking technical and input supports from the input providers and respective government and non-government organizations. There are many actors involved with the sub sector but producer and output market actors play crucial role to run the subsector smoothly. Sometimes farmer's claim that they are not getting fair price due to many

UAG of Dumuria in workshop

reasons on the other hand output market actors sometime says their business are not running well as per expectation. Polder 27/1, 27/2, 29 and 25 are mostly vegetables growing area and other polders in specific portion also grown well vegetables.

Blue Gold Khulna, strengthening value chain engine organized three workshops in 27/1,

Go to page

27/1, 29 and 25 Polder to find out constraints/opportunities and possible interventions of output market actors and producers in vegetables value chain. The workshop organized at training center of Department of Agricultural Extension, Dhaka, where 17/1 and 17/2 WMG members participated and other two subsector organized at central table, Khulna and Sher-e-Bangla road for Polder 29 and 25 respectively. District Agriculture Officer of Khulna was present in all workshops.

Objectives of the workshop were:

- To find out basic information of vegetables (all production and harvesting season, average production/ha, production cost, major markets in the polder, price, benefit etc.)
- Find out what types of vegetables farmers cultivate during winter and summer season and make a priority list
- Find out major constraints face by output market actors especially market, product specifications, and infrastructure (transport supply) and price fluctuation
- Factors affecting price of vegetables and recommendation by output market actors for producers to get fair price
- To find out major constraints face by the producer's in terms of technology, water management, product price, product quality, volume, input/output services market and generally how solve these constraints and find out better ways of solutions and
- Finally make a functional business through output market actors, producers which will increase their own situation.

Participants:

14 and 16 general WMG member who involve in vegetables cultivation and marketing from 17 WMG participated in workshop. Besides 10 output market actors mainly trader and PDA, DAEO officials

Summary[[edit](#) | [edit source](#)]

Report of workshop to find out constraints/opportunities and possible interventions of output market actors and producers in vegetables value chain

A defined set of temporary activities through which facilitators seek to effect change

Value chain - the set of activities that need to be performed in a specific production sector in order to deliver the end product to the consumer. Agricultural value chains typically include input supply, growing/production, processing and marketing/distribution.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
