Bangladesh Water Development Board
Blue Gold Program, Khulna
Training Report
on
Knowledge improvement of the mango-farmers

Participants : Mango Growers
 Location : Polder #2, Satkhira
 Venue : Jahanaabaz Madrasa
 Date : 08.04.2019

Go to page

A day-long training on “knowledge improvement of the mango-farmers” was arranged and conducted on 8 April, 2019 at Jahanaabaz Madrasa, Polder # 2, Satkhira by the help of Zonal Coordinator and other staff of Satkhira. A total of twenty-seven (27) mango growers and mango growers & businessmen participated in the training program. Other than the participants 2 SAAOs, 1 representative from Syngenta and 1 pesticide seller were invited and attended at the training. The training schedule and the list of participants attended in the training course are in **Annexure 1 and 2**.

As indicated in the schedule Group Discussion and group work was held into 5 groups. After long 45 minutes discussion in the group the mango farmers and mango business men noted down some problems and their expectations to the brown papers as follows

Problems:

- a) Pest and disease infestation.
 - Major pests are Hopper, Mango weevil, Mango borer out of which they suffer drastically for hopper out of the above insects. Hopper infestation causes the dryness and dropping of flowers & fruits. Sometimes due to infestation of hopper plant bears no fruit at all.
 - Through discussion we found that the steps and technique they adopt are not appropriate as well as the doses of insecticides and the time of spray are not correct.
 - Another problem for which they suffer is diseases. There are some major mango diseases like Mango Leaf Blight (LB), Sooty mold and Anthracnose (leaf, twigs, mangoes) and sometimes die back also.
- b) Marketing and linkage
 - They need linkage with the SAAO and representatives from pesticide companies;
 - They need linkage with wholesaler.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
