Mid-Term Report EO for M&E of Blue Gold interventions

This is the Mid-Term Report for the Earth Observation mapping for Monitoring and Evaluation of Blue Gold interventions in Bangladesh project. The project is conducted by Satelligence, with the assistance of a local consultant, for the benefit of the Blue Gold 'Monitoring Reflection and Learning Team'. The Mid-Term Report consists of all data processed by Satelligence until 2017. 2018 data will be included in the Final Report due March 2019. The Final Report will have the same set-up but will include updated data (based on the feedback and findings), a more detailed discussion on the results and a more extensive Quality Assurance and Quality Control (QAQC) chapter.

- Contents
- Abbreviations
- 1. Scope
- 2. Context
- 3. Objectives
- 4. Area of Impact
- 5. Deliverables
- 6. Methodology of analysis
- 7. Approach
- 8. Land Use and Land Cover (LULU) classification
- 9. Cropping (Cultivation) intensity, number of harvests
- 10. Minimum size of observed features
- 11. Quality Assurance and Quality Control
- 12. Results
- 13. Land use and land cover
- 14. Cropping intensity
- 15. Discussion
- 16. Main drivers of increase in cropping intensity
- 17. Agricultural system distinguishing cultivated area from fallow
- 18. Trends in Agriculture
- 19. Conclusions
- 20. Recommended next steps
- 21. References
- Appendix A. Data package
- Appendix B. Land use
- Appendix C. Land use maps
- Appendix D. Agricultural land use distribution for all BC polders
- Appendix E. Cropping intensity for all non-Blue Gold polders

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
