Green corner – Save a tree today!

**Mott MacDonald** is committed to integrating sustainability into our operations practices and culture. In a world facing extraordinary challenges we are always looking to improve our own performance and reduce the environmental impact of our business. Sustainable, many of our staff are committed to being sustainable in their personal lives – an important element company that Mott MacDonald shares that conviction. We have an ethical obligation to reduce our emissions and conserve resources, contributing to meeting our own carbon footprint by a maximum of 1% per year on paper.

We print our reports and client submissions using recycled, double-sided paper. Compared to printing single-sided on 44 mg paper, double-sided printing on recycled paper reduces the consumption of raw trees, save a ton of CO2 and a cubic meter of waste paper for every 100 pages. By choosing the greener path we have been able to reduce emissions benefiting both Mott MacDonald and our customers.

We would like to share some of the principles of our own 'Green Corner' initiative:

- Where possible we will prefer that you also consider what really needs to be on paper
- We use alternative means when practicable
- We work on a laptop
- We use reusable paper when possible
- Recycling paper in the office creates a better working environment for our staff and our clients

We believe that you, as one of our esteemed clients, will share our concern for sustainable practices necessary for the benefit of our planet and its inhabitants.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
