Date received Name of applicant

24/03/2015 EcoStories

Proposal topic

Improved Cooking Stoves

22/06/2015	Winning Agro	TA on calf rearing and product placement
22/07/2015	Twijnstra Gudde	Study wind and tidal energy
17/09/2015	MetaMeta	Biological rodent control
03/12/2015	Matrix Consultancy	Strengthening cattle supply chain
01/03/2016	Patuakhali University	Carp & Tilapia hatchery
21/03/2016	Practical Action	Crab market study
07/05/2016	Dutch Water Partners	Feasibility study on commercial water filtration
10/02/2016	Bangladesh Bondhu Foundation (part of GIZ)	Collaboration on improved cookstove dissemination
23/12/2015	Witteveen & Bos	Scoping mission on small scale dredging
24/09/2016	JADE	Study on sheep rearing feasibility in BGP
25/09/2016	BASD	Women Empowerment – Fostering Entrepreneurship of Organic Vegetables and Fish
23/09/2016	Wageningen University	Information service for water logging
10/06/2016	Next Billion	Mobile movies Blue Gold platform
03/10/2016	LCP	Potato processing in BG polders
16/06/2015	BARI	Hydroponics
20/07/2016	BARI	Irrigation technology
04/04/2016	Classical Handmade Products	Handicraft production Sathkira
09/06/2016	Urban Wetlands	Floating Units for Sustainable Water treatment and Agriculture
02/06/2016	Center for River, Harbor & Landslide Research	Climate based adaption against riverbank failure
14/07/2016	Multisourcing	Digital Farmer Field Schools
20/07/2016	SPS	Non-electric fridge
20/0//2010	010	
08/09/2016	North South University	Application of hybrid dryer for agriculture purposes
		C C
08/09/2016	North South University	Application of hybrid dryer for agriculture purposes

Technical Assistance

Blue Gold Program

Bangladesh Agricultural Research Institute

Farmer Field School - A group-based learning process through which farmers carry out experiential learning activities that help them to understand the ecology of their fields, based on simple experiments, regular field observations and group analysis. The knowledge gained from these activities enables participants to make their own locally specific decisions about crop management practices. This approach represents a radical departure from earlier agricultural extension programmes, in which farmers were expected to adopt generalized recommendations that are formulated by specialists from outside the community.

Bangladesh Agricultural University

A livelihood is a way of making a living. It comprises capabilities, skills, assets (including material and social resources), and activities that households put together to produce food, meet basic needs, earn income, or establish a means of living in any other way.

Sub-Assistant Engineer (BWDB)

Value chain - the set of activities that need to be performed in a specific production sector in order to deliver the end product to the consumer. Agricultural value chains typically include input supply, growing/production, processing and marketing/distribution.

An area of low-lying land surrounded by an earthen embankment to prevent flooding by river or seawater, with associated structures which are provided to either drain excess rainwater within the polder or to admit freshwater to be stored in a khal for subsequent use for irrigation.

Wageningen University and Research Centre

Water Management Group - The basic organizational unit in Blue Gold representing local stakeholders from a hydrological or social unit (para/village). Through Blue Gold, 511 WMGs have been formed and registered. The average WMG covers an area of around 230 ha has 365 households or a population of just over 1,500.

Patuakhali Science and Technology University

Soil is regarded as waterlogged when it is nearly saturated with water much of the time such that its air phase is restricted and anaerobic conditions prevail. In agriculture, various crops need air (specifically, oxygen) to a greater or lesser depth in the soil. Waterlogging of the soil stops air getting in. How near the water table must be to the surface for the ground to be classed as waterlogged, varies with the purpose in view. A crop's demand for freedom from waterlogging may vary between seasons of the year.

Center for Environmental and Geographic Information Services

Resource Farmers (RF) are members of Farmer Field Schools (FFSs). They are selected from the FFS groups to lead other members in organizing different useful collective actions and to maintain networks on behalf of the members. These RFs are given additional capacity building training to enhance their knowlege on simple record keeping and business skills.

Water Management Group - The basic organizational unit in Blue Gold representing local stakeholders from a hydrological or social unit (para/village). Through Blue Gold, 511 WMGs have been formed and registered. The average WMG covers an area of around 230 ha has 365 households or a population of just over 1,500.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
