Module:Citation/CS1/Whitelist

From Blue Gold Program Wiki

< [Module:Citation/CS1](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

```
{{#lst:Module:Citation/CS1/doc|header}}
```

This page contains a list of all parameters considered by [Module:Citation/CS1](#), though not all parameters would be used for all citations.

The content shown here was initially generated by [Module:Citation/CS1/Arguments](#) but is now maintained by hand to allow parameters to be assigned one of several defined states. Current states are: active (true), deprecated (false), and obsolete (nil).

```
{{#lst:Module:Citation/CS1/doc|module_components_table}}
```

```
--[[-----< S U P P O R T E D   P A R A M E T E R S >-----  
-----
```

Because a steady-state signal conveys no useful information,
whitelist.basic_arguments[] list items can have three values:

- true - these parameters are valid and supported parameters
- false - these parameters are deprecated but still supported
- nil - these parameters are no longer supported. remove entirely

```
]]
```

```

```

Cite arXiv, cite biorxiv, cite citeseerx, and cite ssrn are preprint templates that use the limited set of parameters defined in the limited_basic_arguments and limited_numbered_arguments tables. Those lists are supplemented with a template-specific list of parameters that are required by the particular template and may be exclusive to one of the preprint templates. Some of these parameters may also be available to the general cs1|2 templates.

Same conventions for true/false/nil as above.

```

]]

```

```

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
